3D DIRECT TO WALL INKJET PRINTER - Print Head Price

We supply printers equipped with three different types of heads one is i1600 print head replacement cost Rs. 85,000.00 and the second is i3200 head replacement price is 1.25 Lakhs plus GST, DX7 head replacement cost is Rs. 75000.00 plus GST extra as applicable.

What is the difference between I1600 and I3200 print head?

As we all know, the print head is one of the most important components of digital inkjet printer. It represents the printing accuracy, response speed and colour reproduction capabilities of a digital printing machine, and has a huge impact on printing performance and finished product quality.

The I1600 print head is a new type of print head released by EPSON in 2023. It has a precise internal structure, accurate ink placement, and consistent ink droplet size. It has the same specifications as the I3200 in terms of size, nozzle resolution and drop ejection performance.

The difference is that the I1600 has 1,600 nozzles (half of the I3200 print head), and the original 8 channels have become 4 channels. The print head is divided into three series: A1 series is suitable for water-based ink, U1 series is suitable for UV ink, and E1 series is suitable for eco-solvent ink.

Using the I1600 print head, you can basically achieve the high precision of I3200 printing and meet the high quality requirements for finished products. Although its printing speed is relatively slow, it is more cost-effective! It can be said that the I1600 print head is the economical alternative to the I3200 print head.

Photo of i1600 Print Head

Photo of i3200 Print Head

I3200 is a highly used print head on the market. It has 3200 nozzles and high resolution (600dpi/color). It can achieve up to 4 colors of output and the printing speed is greatly improved. Its biggest advantage is its high speed.

If you have higher efficiency requirements for printing needs, it is recommended to choose the I3200 print head.

Epson DX7 Print Head

Epson DX7 Series F189000 2nd LOCKED Print head

Explore the precision and innovation of the Epson DX7 Series F189000 2nd LOCKED Print head, designed for use with eco-solvent and mild solvent inks. This Micro-Piezo technology-driven print head delivers outstanding print quality with a native resolution of 360 dpi.
