

## Safety and Handling

TreeLife Urban™ is developed with safety and simplicity in mind—safe for users, safe for the environment, and straightforward to manage from delivery through application.

### Safe Storage

- Store TreeLife Urban™ in a cool, dry, and shaded place, protected from direct sunlight and heavy moisture.
- Ensure bags or containers are tightly resealed after each use to preserve product integrity and microbial vitality.
- Avoid storing directly on bare ground or in extremely humid settings, to prevent premature decomposition.

### Shelf Life:

When stored correctly, TreeLife Urban™ maintains its full effectiveness for 12 months.

### Safe Handling Practices

- Always wear gloves when handling the substrate, particularly if you have sensitive skin.
- Wash hands thoroughly after use and avoid touching your face during application.
- If handling larger volumes indoors or in enclosed spaces, use a dust mask to prevent inhaling fine particles.

### Eco-Friendly Disposal

- Any unused product or spills may be safely returned to gardens, compost systems, or green spaces—TreeLife Urban™ contains no hazardous chemicals.
- Packaging is made from recyclable plastics—please recycle all bags and containers per your local municipal guidelines.

### First Aid Guidance

- In case of skin or eye contact, rinse well with water.
- While TreeLife Urban™ is non-toxic, if accidental ingestion occurs and irritation develops, seek medical advice.
- No safety incidents have been reported to date.

TreeLife Urban™ is designed for safety, with robust quality control and entirely non-toxic, natural ingredients—giving you peace of mind at every stage of your greening projects.
