DELHI'S NEW SCHOOL FEE LAW PUTS PARENTS IN CHARGE

THE DELHI GOVERNMENT HAS INTRODUCED THE DELHI SCHOOL EDUCATION (TRANSPARENCY IN FIXATION AND REGULATION OF FEES) BILL, 2025, AIMING TO REGULATE FEES IN ALL PRIVATE SCHOOLS ACROSS THE CITY.

The bill, passed in the Monsoon Session of the Delhi Assembly, extends fee regulation to all 1,700 private schools, closing a loophole from the 1973 rules which covered only 300 schools. It introduces committees comprising parents, teachers, school management, and government representatives to oversee fee fixation and grievance redressal.

6 DELHI SCHOOLS RECEIVE BOMB THREAT

At least six schools in the national capital received bomb threats on Thursday 21 August through e-mail.

Calls regarding the bomb threat were received between 6:35 am and 7:48 am in six schools in the capital. These include Andhra school in Prasad Nagar, BGS International School, Rao Man Singh School, Convent School, Max Fort School and Indraprastha International School, Dwarka. Police teams, along with fire personnel and bomb disposal squads, rushed to the premises immediately.

STRATEGIES SCHOOLS CAN ADOPT TO SUPPORT REVISION FOR MID-TERM EXAMINATION

- Organise remedial classes for weaker students focusing on core concepts in Maths, Science, and English. Pair stronger students with weaker ones for guided peer learning.
- Create simple but progressive worksheets on basic topics. Start with easy-to-solve exercises, then gradually increase complexity.
- Before moving to higher-level questions, ensure students master fundamentals (tables, formulas, grammar rules, definitions).
- Set small, achievable goals for weaker students ("learn 5 new words today," "solve 10 sums correctly").
- Give individual feedback to weaker students to boost confidence and correct mistakes early.

MEASURES SCHOOLS CAN TAKE FOR SANITATION & SAFETY IN MONSOON

- Schools must advise parents to take recommended seasonal vaccinations (like flu shots, typhoid, hepatitis A) as advised by doctors, wear full-sleeve clothes and trousers to prevent mosquito bites. Apply mosquito repellent cream or roll-on before coming to school. Always carry a raincoat or umbrella to avoid getting drenched. Parents must keep children at home if they show signs of fever, cough, cold, or stomach infection.
- Schools must ensure toilets are clean, dry, and disinfected multiple times daily. Ensure filtered/boiled drinking water is available; clean water tanks frequently. Ensure canteen food is fresh, covered, and hygienically prepared. Place doormats and anti-slip mats at entrances to avoid slipping accidents. Keep first-aid kits ready with fever, cough, and stomach infection medicines
