🔍 **Uniswap**

However, when you search Uniswap on app store, you will not find it!

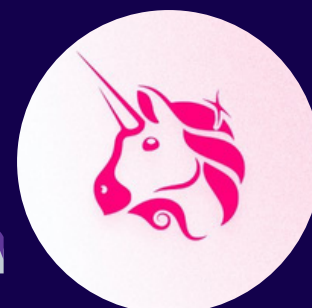

Not Available

Question: Do Uniswap have try to reach out Apple?

"7/ So why a limited early release from a team committed to access for anyone? Simply put, Apple won't green-light our launch, & we don't know why. We submitted our mobile app months ago—and even though we are 100% compliant with their specifications, we're still stuck in limbo"

The solution

Uniswap found a way to publish the ISO version without the need of Apple approval, but this version will limit the amount of people join

Uniswap has conducted a TestFlight app for **10,000** users, especially those who join ETHDenver

Do not worry Uniswap will wait for their application approval from apple, so more people can used the application and buy your favorite crypto there
