INTRODUCTION

Our surroundings and the spaces we occupy have the ability to alter and define the way we live our lives. Whether a busy working office, hotel dining room or shared outdoor space, each environment has the potential to uplift and inspire, bringing a sense of comfort to all who inhabit them.

Working with a collective of designers, our desire at &Tradition is to create pieces that will stand the test of time – taking care to curate a collection of furniture, lighting and objects that elevate and enhance every setting.

As we guide you through the scope of our collection – from expansive seating configurations which encourage conversation and connection, to outdoor furniture pieces designed to sit in harmony with the natural world – we aim to provide convenient solutions tailored to suit every circumstance.

IMPACT

Our intention since establishing &Tradition in 2010 has been to deliver a curated collection of purposeful designs that have been made to last. With a passionate approach to masterly design, we strive to honour icons of the past whilst creating the classics of tomorrow, crafting timeless, reliable pieces and caring for them as they age.

As a certified B Corp, we are part of a movement that puts the wellbeing of people and respect for the planet at the forefront. We are also committed to acting in a way that benefits everyone impacted by our actions, including workers, customers, communities and the environment.

Read more about our work with B Corp by visiting our Impact Page *here*.

Carbon Emissions Summary

To streamline our collective efforts towards halting global warming, we are working towards a decarbonisation strategy. This starts with taking account of current CO₂e emissions across the brand operations and supply chain, and identifying opportunities to reduce them.

In order to assist our clients in completing their CO₂e reports, we are able to provide CO₂e summaries for projects upon request.

We calculate the estimated lifetime CO₂e emissions of our products using a carbon calculation tool developed specifically for the furniture industry. The calculation takes into account the full material composition of a product, component origin, packaging, transportation from the production facility to the customer's region.

This climate footprint report is calculated according to the EUs rules for Product Environmental Footprint (PEF). The summary will assign a CO₂e amount to the item within the order along all life stages, including production waste, use stage and disposal.

Please get in touch with your sales contact for more information.

OFFICES

With long-term durability in mind, our extensive range of tables and chairs promote efficiency and a simplified approach to working. Meanwhile, our collection of portable lamps, pendants, wall, table and floor lamps illuminate spaces with style and precision.

From Hee Welling's Rely chairs and Drip tables, to a large and highly customisable selection of sofas, each piece is designed to support a range of working styles and purposes, fitting seamlessly into offices and meeting rooms alike.

PUBLIC SPACES

Maintaining a keen awareness of public spaces and their varied requirements, our customisable tables can be configured to suit meeting areas and collaborative workspaces alike, whilst our range of stackable chair options allows for easy movement and storage.

For a combined sense of support and comfort, our Meantime series offers an opportunity to find respite between moments of transit. Meanwhile, the interlocking modules of the Develius sofa can be orientated to create large seating arrangements suited to airport lounges and other busy environments.

Pavilion AV52 Lacquered Walnut w. Fiori 0581

With an extensive range of finishes to choose from, including wood, stone and metal, as well as colourful, recycled plastics, laminates, textiles and upholsteries, there is a plethora of ways to create a visually cohesive yet highly efficient environment.
