

# ReLINE

Designed and made in Aotearoa New Zealand.

# End-of-life For Every Piece

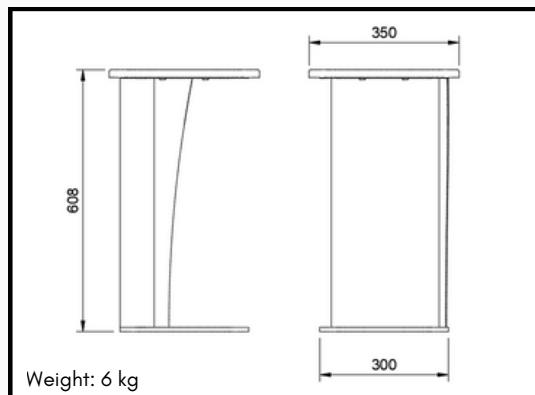

ReLINE has been designed to support long-term, responsible specification. With an expected 20-year lifespan, the table can be fully deconstructed into mono-material components at end-of-life, allowing straightforward recycling. The recycled plastic surface can also be sanded and refinished to extend its use well beyond typical furniture lifecycles.

By specifying ReLINE, designers are choosing a product that aligns environmental responsibility with considered design – one that allows sustainability to be expressed confidently, visibly, and without compromise.

## All Mechanical Fixings

For simple  
deconstruction to end-  
of-life after a 15-year use.

## Designed for Home & Office

ReLINE balances  
presence with a compact  
footprint.

## Simple Assembly for fast Installation

Delivered as a 2-part  
assembly for fast & easy  
Installs.

### Goldfinch Cleanstone

---

A deep red surface,  
capturing energy and  
warmth.

---

RRP \$1XXX

---

A warm off-white surface  
with gentle variation and  
depth.

---

RRP \$1XXX

# Celebrating Sustainability

Championing circular design and recycled plastics in high-end interior spaces.

ReLINE is a sculptural side table designed to showcase the aesthetic potential of recycled materials in contemporary spaces. Guided by circular design principles, the table transforms discarded resources into a refined product tailored for high-end interiors.

ReLINE demonstrates how considered design can elevate recycled matter into premium furnishings, redefining value within the circular economy and paving the way for a sustainable future in design.
