

HIGH THERMAL PERFORMANCE CUSTOMIZABLE GLASS GARAGE DOORS

INTRODUCING WINDLYFT HTP BY WINDSPEC INC.

Crafted with reinforced, heavy-gauge architectural aluminum for unmatched strength and high thermal performance. Windlyft garage doors contain an industry first glass-reinforced nylon thermal barrier.

Featuring a modern and expansive glass design, this versatile garage door allows homeowners to create a seamless climate controlled indoor-outdoor experience. Perfect for spaces like dream garages, pool houses, patios, and entertainment areas.

Commercial applications such as hospitality, automotive and fitness industries greatly benefit with a Windlyft HTP or Windlyft S garage door. Energy efficiency, durability, along with customizable colours, glass and door hardware delivers an enhanced brand experience.

FEATURES AND SPECIFICATIONS

- Architectural aluminum construction: a robust 2-inch deep aluminum frame ensures long-lasting, low-maintenance performance with a modern look.
- Streamlined appearance: sleek 3-inch sightlines offer a contemporary design while maximizing visibility.
- Superior energy-efficiency: glass reinforced nylon thermal break - the only in the garage door industry provide excellent thermal efficiency for consistent comfort throughout the year.
- Weather-resistant seals: precision-engineered section joints prevent air and water infiltration, ensuring reliable performance in any climate.
- Reinforced durability: enhanced structural reinforcements deliver added strength, particularly for larger double-door models.
- Additional reduction of exterior noise.
- Colour matching hardware available.
