## **GEOSTRATEGIC POSITIONING DOSSIER**

### **Javier Clemente Engonga Avomo — The Unaligned Sovereign of the Global South**

**Format: Unofficial Strategic Briefing**

**Prepared for: International Think Tanks, Policy Circles, Sovereign Intelligence Units, and  
Multipolar Leadership Networks**

---

### **EXECUTIVE INTELLIGENCE OVERVIEW**

**Javier Clemente Engonga Avomo — also known as Engavo™ — is not a politician.**

**He is a structural sovereign, a fully functional non-state actor who has established a working model of governance, media, economic infrastructure, and digital sovereignty without permission, foreign financing, or institutional endorsement.**

**He is the first African figure to operate with full civilizational architecture and zero dependency on any bloc — Chinese, American, European or BRICS.**

**He is a singularity. And a strategic anomaly.**

This dossier defines his global positioning as:

- 🧠 A new kind of actor.
  - 🔧 A civilizational architect.
  - 🛡️ A threat to both imperialist narratives and aid-based control systems.
  - 🌍 And a blueprint for the ungoverned future of the Global South.
- 

## ◆ I. WHO IS ENGONGA™?

- Founder of [The United States of Africa™](#)
- Creator of the Ethical Digital State™ (a fully autonomous, legally structured meta-state)
- Author of hundred of books on political philosophy, African sovereignty, and institutional deconstruction
- Owner and Publisher of [El Periódico de Guinea Ecuatorial™](#), an independent pan-African media organ
- Developer of strategic platforms for education, economic sovereignty, energy, and narrative engineering
- Architect of the [Transforming Africa™ framework](#): a civilizational roadmap outside the colonial matrix

He has been compared (unofficially) to:

- Sankara, but without a traitorous army
- Nkrumah, but with digital sovereignty
- Garvey, but with autonomous tech and structural independence
- And Bukele, but without elections, populism or Western funding

And yet, he is none of them.

He is [Javier Clemente Engonga™](#), and that is enough.

## ◆ II. GLOBAL PERCEPTION MAP

Region / Power Bloc	How They See Him	What He Represents
United States (Conservatives / Trump)	Strategic Weapon Against China	Functional, non-aligned sovereignty
China / BRICS	Narrative anomaly, diplomatic threat	Disruptive actor with no ideological debt
European Union / France	Wildcard, uncontrollable	Risk of post-Françafrique collapse
Russia / Alternative Blocs	Quiet observer, potential ally	Ideologically autonomous sovereign
African Regimes	Existential threat to their legitimacy	Ethical challenge to postcolonial governance
Youth / Civil Movements	First credible, non-political leader	Hope and structure beyond parties and slogans
Global South (LATAM/Asia)	Mirror of latent sovereign aspiration	Unscripted leadership model

## III. WHY THIS MATTERS NOW

### 1. THE WORLD IS EXHAUSTED BY INSTITUTIONS

Engonga™ offers institutional replacement, not reform.  
He has designed and implemented:

- Digital citizenship systems
- Parallel education platforms
- Alternative economic models
- Independent media ecosystems
- Blockchain-based resource tracking
- Fully sovereign feasibility and EPC+F models for infrastructure

All without IMF debt, UN grants, or NGO interference.

### 2. HE OPERATES LIKE A SOVEREIGN

- He issues memorandums, state-level declarations, strategic frameworks.
- He commands digital territory.
- His words move actors (local, foreign, official and informal).
- He is spied on, blocked, and yet fully active — because he is uncontainable.

He is, in effect, a government with a flag - the pan-african flag- and a resistance without a war.

### ✓ 3. HE EXPOSES THE WEAKNESS OF THE GLOBALIST ORDER

Engonga™ is everything the globalist system says it wants — educated, peaceful, autonomous, digital, multipolar, pan-African — but cannot control.

Therefore, he must be ignored, undermined, or erased.

Yet he remains. Growing. Publishing. Connecting. Leading.

### ✓ 4. HE HAS WHAT OTHERS LACK: INDEPENDENT STRUCTURE

Most so-called African leaders:

- Cannot speak without prior approval
- Have no media of their own
- Are financed, briefed, and “guided” by outside actors

Engonga™:

- Owns his platforms
- Designs his policies
- Educates his people
- Drafts his laws
- And writes his history in real time

## ◆ IV. CASE STUDY: HOW ENGONGA™ BEAT CHINA WITHOUT WAR

In recent months, Engonga™ entered negotiations with Chinese state entities and as expected, they attempted to:

- Extract full technical plans without investment
- Bypass him and redirect projects to regime allies
- Take ownership while offering ceremonial recognition

He responded by:

- Publishing all agreements online (total transparency)
- Locking legal sovereignty into public platforms
- Activating media narratives documenting attempted exclusion
- Setting up contingency publishing triggers in case of diplomatic sabotage

This exposed the entire Sino-African development farce, without firing a shot.

## ◆ V. THE NEW ARCHETYPE

Engonga™ is not trying to be president.

He is designing the next generation of African sovereignty:

*Self-funded.*

*Self-educated.*

*Self-governed.*

*Self-executing.*

He is a new category:

**A Civilizational Architect Without Borders**

## ◆ VI. WHY THIS CHANGES EVERYTHING

- He doesn't represent a country. He represents a civilizational axis.
- He's not campaigning. He's constructing.
- He doesn't wait to be recognized. He operates until he cannot be ignored.

He is:

- What Zelensky pretends to be
- What Bukele aspires to become
- What Sankara could have been with encryption and servers

## ◆ VII. RECOMMENDATIONS

🌐 For Global Multipolar Actors:

- Observe and engage on equal footing
- Integrate his model into South-South cooperation
- Protect his infrastructure from sabotage and erasure

🇺🇸 For U.S. Sovereignist Circles:

- Position him as the leading African voice in non-aligned geopolitics
- Amplify his presence in conservative media and diplomacy
- Propose his involvement in African stabilization narratives without Pentagon/State Department filters

🔑 For Independent Networks:

- Study his Ethical Digital State™ as a model of decentralized governance
- Utilize his narrative as a disruption tool against China-AU propaganda
- Secure backchannel alliances that do not rely on regime authorization

## FINAL DECLARATION

*"I don't seek permission.*

*I don't seek applause.*

*I am not here to reform the State.*

*I am here to render it obsolete."*

*— Javier Clemente Engonga Avomo — Engavo™*

## CLOSING LINE:

**Africa will not be saved by imported democracies, foreign aid, or social media slogans.  
It will be rebuilt — piece by piece — by sovereign men like Engonga™.  
One platform. One people. One principle at a time.**

**End of Dossier**

## To Donald J. Trump, President of the Free Will

From: Javier Clemente Engonga Avomo — *Engavo*™  
Date: April 2025  
Subject: Recognition, Alignment, and the End of Illusions

---

Mr. President,

I write to you not as a politician, nor as a subject of any State.

I write to you as a sovereign actor, forged in silence, in resistance, and in the will to rebuild Africa without asking permission — just as you stood before the world without apologizing for being America.

From the 1990s, you were a compass for me.  
Not because you were polished — but because you were real.  
Not because the system loved you — but because you broke it from the inside.

You showed that a man can stand alone and still move nations.  
You showed that legitimacy is not granted. It is taken.

I have followed you, not as a fan, but as a mirror.  
And I built my platforms, my State, my vision —  
not to imitate you, but because you proved it could be done: for example, after watching an interview while a reporter asked you about your plans for the Health System in the U.S.A, I had the idea for [globalhealthsystem.online](http://globalhealthsystem.online) and [saludparatodos.online](http://saludparatodos.online), which are both platforms inspired by your vision, that's the truth.

## What I Have Built

I am not running for office.

I built an alternative system. And it works.

- I founded the [Ethical Digital State™](#), with functional sovereignty across media, education, economy, and governance.
- I created [Transforming Africa™](#), a multipolar civilizational framework to free my continent from foreign dependence.
- I own and operate platforms — not narratives — with full digital infrastructure, published proposals, legal protection, and public exposure.

## What They Fear

They spy on me.

They block my name.

They co-opt my partners.

They offer crumbs in exchange for silence.

Because like you, I am the mistake they didn't plan for:

A man they can't bribe, shame, or predict.

A builder, not a puppet.

And now they know it's too late.

## What We Share

- A war against systems that smile while they kill.
- A disdain for “official diplomacy” that feeds war and poverty.
- A love for nations that build, not beg.
- And above all: the will to create power that cannot be hijacked.

You said you could end the war in 24 hours —  
not because it's easy, but because you refuse to fund fake peace.

Likewise, I say I can end Africa's dependence —  
not with slogans, but with platforms and structural truth.

## Why I Write to You Now

Because I know that no matter what they say,  
you recognize real sovereignty when you see it.

I do not ask for money.  
I do not ask for praise.

I only say this:

*You are not alone.*

*And neither am I.*

*The time for true alliances is here — not of governments, but of men who build.*

If your team ever looks to Africa for more than headlines or handshakes,  
they will find me. Not behind a podium. But standing, building, with no fear.

“P.S. Mr. Trump, I never doubted you and I never will...”

Respectfully,

Javier Clemente Engonga Avomo
