## UPVC Window Collection

## Tilt & Turn Window

Tilt and turn windows tilt inwards for ventilation or turn so the window fully opens, as the name suggests. This cleverly designed hinge mechanism makes tilt windows easy to clean from the inside.

The biggest benefits of UPVC tilt and turn windows are the flexibility when it comes to ventilation and how easy they are to look after. The window doesn't need to be fully open to let air into your home, simply tilt the window open and adjust the angle. This also makes them easy to clean both the inside and outside without the use of a ladder or danger of leaning out of the Window. Tilt and turn window handles have a 'safe handle' option, which locks the handle securely when tilted inwards, preventing it from being pushed open further.

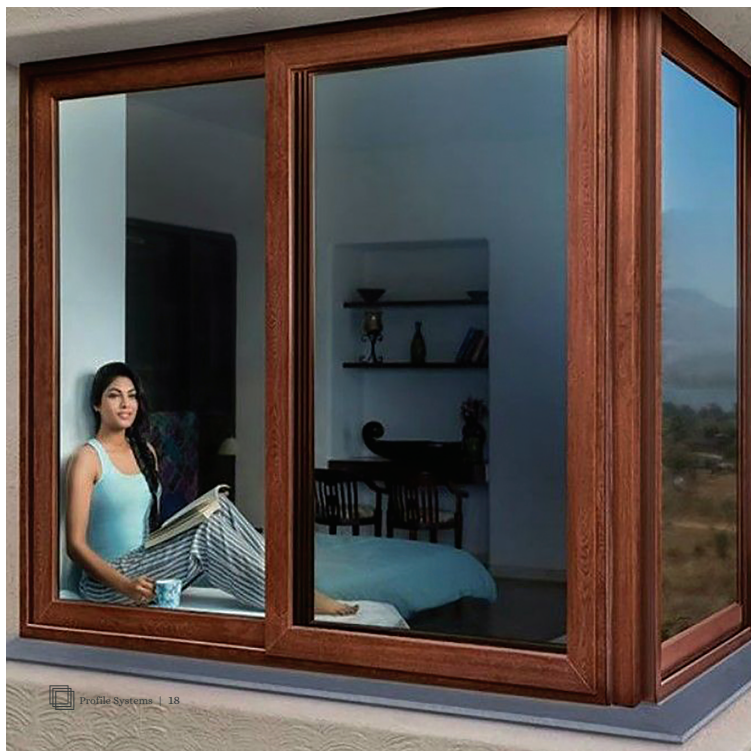

## Casement Window

UPVC casement windows are our most popular choice. Each one is individually designed according to your specifications and manufactured by our team of skilled craftspeople in our factory, using the highest-quality, energy-efficient materials.

With interiors taking precedence in private as well as commercial establishments, one can come across a lot of new styles and designs for windows. Among these, casement windows are preferred by many. In this, the window pane is attached to the frame by one or more side hinges. Known to be one of the best choices for houses windows, a casement window can open both inwards and outwards, to the left or right, which allows maximum flow of air into the room. Available in single as well as double panes, casement windows are extremely energy-efficient and are available in different designs to select from.

## Sliding Window

Sliding windows comprises of two or more than two horizontal sashes that are fitted with rollers at the base for smooth sideward track movement. Easy to operate, these windows offer panoramic views and a great amount of ventilation.

From a UPVC sliding balcony windows to sliding kitchen windows, there are many types of UPVC sliding windows available these days. You can easily choose a UPVC sliding window for your home from different sliding window designs after going through the UPVC sliding sash windows prices form the list of 2/ 3/ 4 track UPVC sliding windows. You can also choose UPVC sliding glass doors for balcony, kitchen or some other place to give your house a beautiful makeover with sliding windows and doors.

## Fixed Window

Fixed windows are an imperative part of both residential setups and workplaces. Our UPVC fixed windows are built by utilizing top quality materials and technologies to provide you with the most durable, efficient, and appealing fixed window designs that do justice to all your needs and requirements. Fixed windows are also popularly known as picture windows. These are stationary, non-opening windows which are designed to allow light into a room and offer an unobstructed view of outside. Profile systems UPVC fixed windows go even further by greatly enhancing the aesthetics of your home. With several fixed window design options, you will be spoilt for choice when it comes to deciding which type to buy. You also have the option to pair it with other types of fixed windows to make a style statement that is unique to you. We also offer options in glass design with the fixed windows to help maximise the aesthetic appeal of your home.

## Tilt & Slide Windows

Tilt & Slide windows are a space saving solution if you have little room inside your home. They can be opened fully by sliding or tilted inwards for efficient ventilation. Tilt & Slide windows achieve a better insulation than standard sliding windows. They also give you a tilt option, which is perfect for ventilation while keeping your home secure from intruders.

## French Window

UPVC French windows increase the design aesthetic and are the most secure form of windows. They are a pair of casement windows which are hinged to the side walls of the floor and can be designed to be opened inward or outward, which lets you feel the breeze of air and see the panoramic view of the outdoors by creating an unobstructed view in the centre. Made from high quality UPVC Frames, UPVC French Windows are durable and an all-weather solution.

## UPVC Door Collection

## Sliding Door

One of the most preferred styles that people opt for today are sliding doors. The design of a sliding door is crafted in such a way that it offers unhindered access and doesn't take up too much space. As the functioning of sliding doors is effortless and noiseless, the mechanism of sliding doors is also often referred to as the Silent System. Enhance the aesthetic appeal of your home with a wide range of elegant sliding doors by profile systems. We are a leading manufacturer and supplier of high-quality UPVC sliding doors in UAE. All our doors are engineered with extreme precision and care.

## Folding Door

Folding doors or bi-fold doors can be just the architectural feature that makes your home stand out. Choosing to install UPVC folding doors by profile systems will prove to be a brilliant addition for your home as they will help create a stunning and contemporary environment for you to rest, play, and work in. They are without question one of the most effective and artistic ways to open up your house without compromising with the open space inside. In fact, the range of sleek and foldable sliding doors and the folding & sliding glass doors by profile systems allows you to have more usable space in the room as compared to conventional door designs, at the same time, they will also be the focal point of any lounge, kitchen, or dining space.

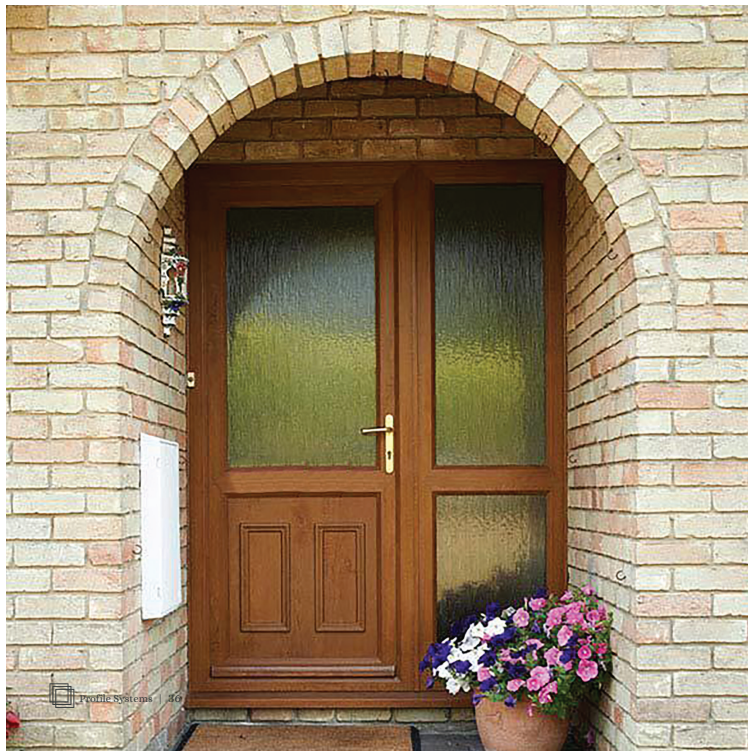

## Tilt & Slide Door

Tilt & Slide doors are a space saving solution if you have little room inside your home. They can be opened fully by sliding or tilted inwards for efficient ventilation. Tilt & Slide doors achieve a better insulation than standard sliding doors. They also give you a tilt option, which is perfect for ventilation while keeping your home secure from intruders.

## French Door

Profile systems popular French Doors are durable and secure. French Doors are a great luxury to have, not only are they aesthetically pleasing but they save space by opening outwards or inwards depending on space available, being ideal for homes with limited space.
