

At Coética, we believe that peace and ethical coexistence begin at the local level and extend to the national and international spheres.

Our approach to ethical coexistence fosters active engagement between people, values, and communities,

going beyond the mere tolerance of differences.

From Spain, we promote youth training programmes, initiatives, and collaborative

spaces that inspire responsible action grounded in ethics and human commitment.

At the international level, we foster networks and partnerships that promote peace and humanitarian support, turning ethics into concrete action.

Let's make a difference together!

Join our community for ethical and humanitarian action.

About us

The Coética Centre is founded on the principle of “ethical coexistence”, understood as an integrative framework that brings together citizenship, ethical reflection, and humanitarian action within a shared sense of purpose. This approach not only promotes values but also translates them into practical actions with a positive impact on individuals and communities. Our work operates on two levels: local and global.

Local level

- Ethical coexistence
- Difference = Opportunity
- Plurality = Strength

Global level

- Cross-border connection
- Human solidarity
- Shared responsibility

Through training programmes, youth-focused initiatives, and the creation of collaborative networks, we develop projects and spaces for engagement that foster dialogue, understanding, and cooperation among diverse actors.

In this way, we promote a practical ethics that strengthens social cohesion, encourages both individual and collective responsibility, and contributes to building a culture of peace, solidarity, and cooperation at both local and global levels.

Vision

To make Coética a leading reference centre in Europe for promoting ethical citizenship and civilised coexistence, actively contributing to humanitarian action and global peace from Spain.

Mission

To develop training, research, and practical action programmes with real impact, translating the principle of ethics into both local and international dimensions through direct action in Spain and influence at the global level.

Values and Guiding Principles

Peace

Peace is a human value that is born in the heart and reflected in actions, as an ethical way of life that goes beyond the political sphere and seeks to be promoted at all times.

Humanity

All the centre’s activities are grounded in human dignity and in respect for applicable ethical standards and international normative frameworks.

Coexistence and Diversity

We promote spaces for encounter and cooperation among people from different backgrounds, fostering inclusion and mutual respect.

Global Solidarity

We promote awareness of interdependence and shared responsibility among communities in addressing common challenges.

Transformative Education

We promote educational processes aimed at developing critical thinking, empathy, and social responsibility.

Independence and Neutrality

The centre operates with institutional autonomy, without political or ideological alignment, guided exclusively by ethical principles and humanitarian objectives.
