Leather Coating Agent LX 904

'LX 904' is a premium leather coating agent which forms a water-repellent coating on the surface of the leather to protect leather from the penetration of outer dust. By protecting the original texture and color of the leather, the luxury of the vehicle can be maintained for a long time, and convenience of management is maximized with excellent anti-inflammatory protection and anti-fouling performance.

Glass Coating Agent GX 910

'GX 910' is a high performance glass and water repellent glass coating to boast perfect visibility and excellent water repellent performance that lasts for a long time, even driving at night or in rain. It allows you to drive more comfortable with no wipers when driving more than medium speed due to repellency of rainwater.
