- To fix the tiles, comb the adhesive to the required depth (between 3 - 6 mm) using a suitable trowel.
- Press the tiles firmly into position with a slight twisting action, checking periodically that good contact is maintained with the back of each tile.
- Leave no voids behind tiles when solid-bed fixing.
- Tiles should be fixed within 20 minutes of adhesive being applied, depending on the porosity of the surface and atmospheric conditions.
- Tiles can be adjusted up to 10 - 15 minutes after fixing.
- Touch the adhesive ribs periodically, and if a skin has formed, remove the adhesive and apply a new layer.
