

The art of furniture.

Design studio.
Furniture & interior/exterior design

Welcome to the universe of **ALTEREDESIGN®**

Fonder & Designer
Neisius Davoudi Kyan

Origin.

The story of Alteredesign® is one of passion transformed into a creative journey. Founded by a visionary designer with a lifelong love for creation, our studio embodies the fusion of craftsmanship and artistic exploration.

With a master’s degree in industrial design, our founder gained deep expertise across various design fields, from furniture and product design to automotive design. His early years as a freelance designer were marked by diverse collaborations, yet it was through his travels and a fulfilling experience with an Italian luxury furniture brand that he discovered his true calling.

Alteredesign® was born from this desire to offer unique creations, where each project is approached as a custom journey.

Whether it’s furniture, interior architecture, or decoration, we believe in the power of design to transform spaces and enrich everyday life. In these pages, you’ll discover the soul of Alteredesign®: a studio where innovation meets aesthetics, and where every creation is crafted to become a timeless work of art.

The studio.

Vision.

At Alteredesign®, we believe that a home should be a unique space that meets the needs of its inhabitants and reflects their personality. That's why we transform living spaces with true functional works of art.

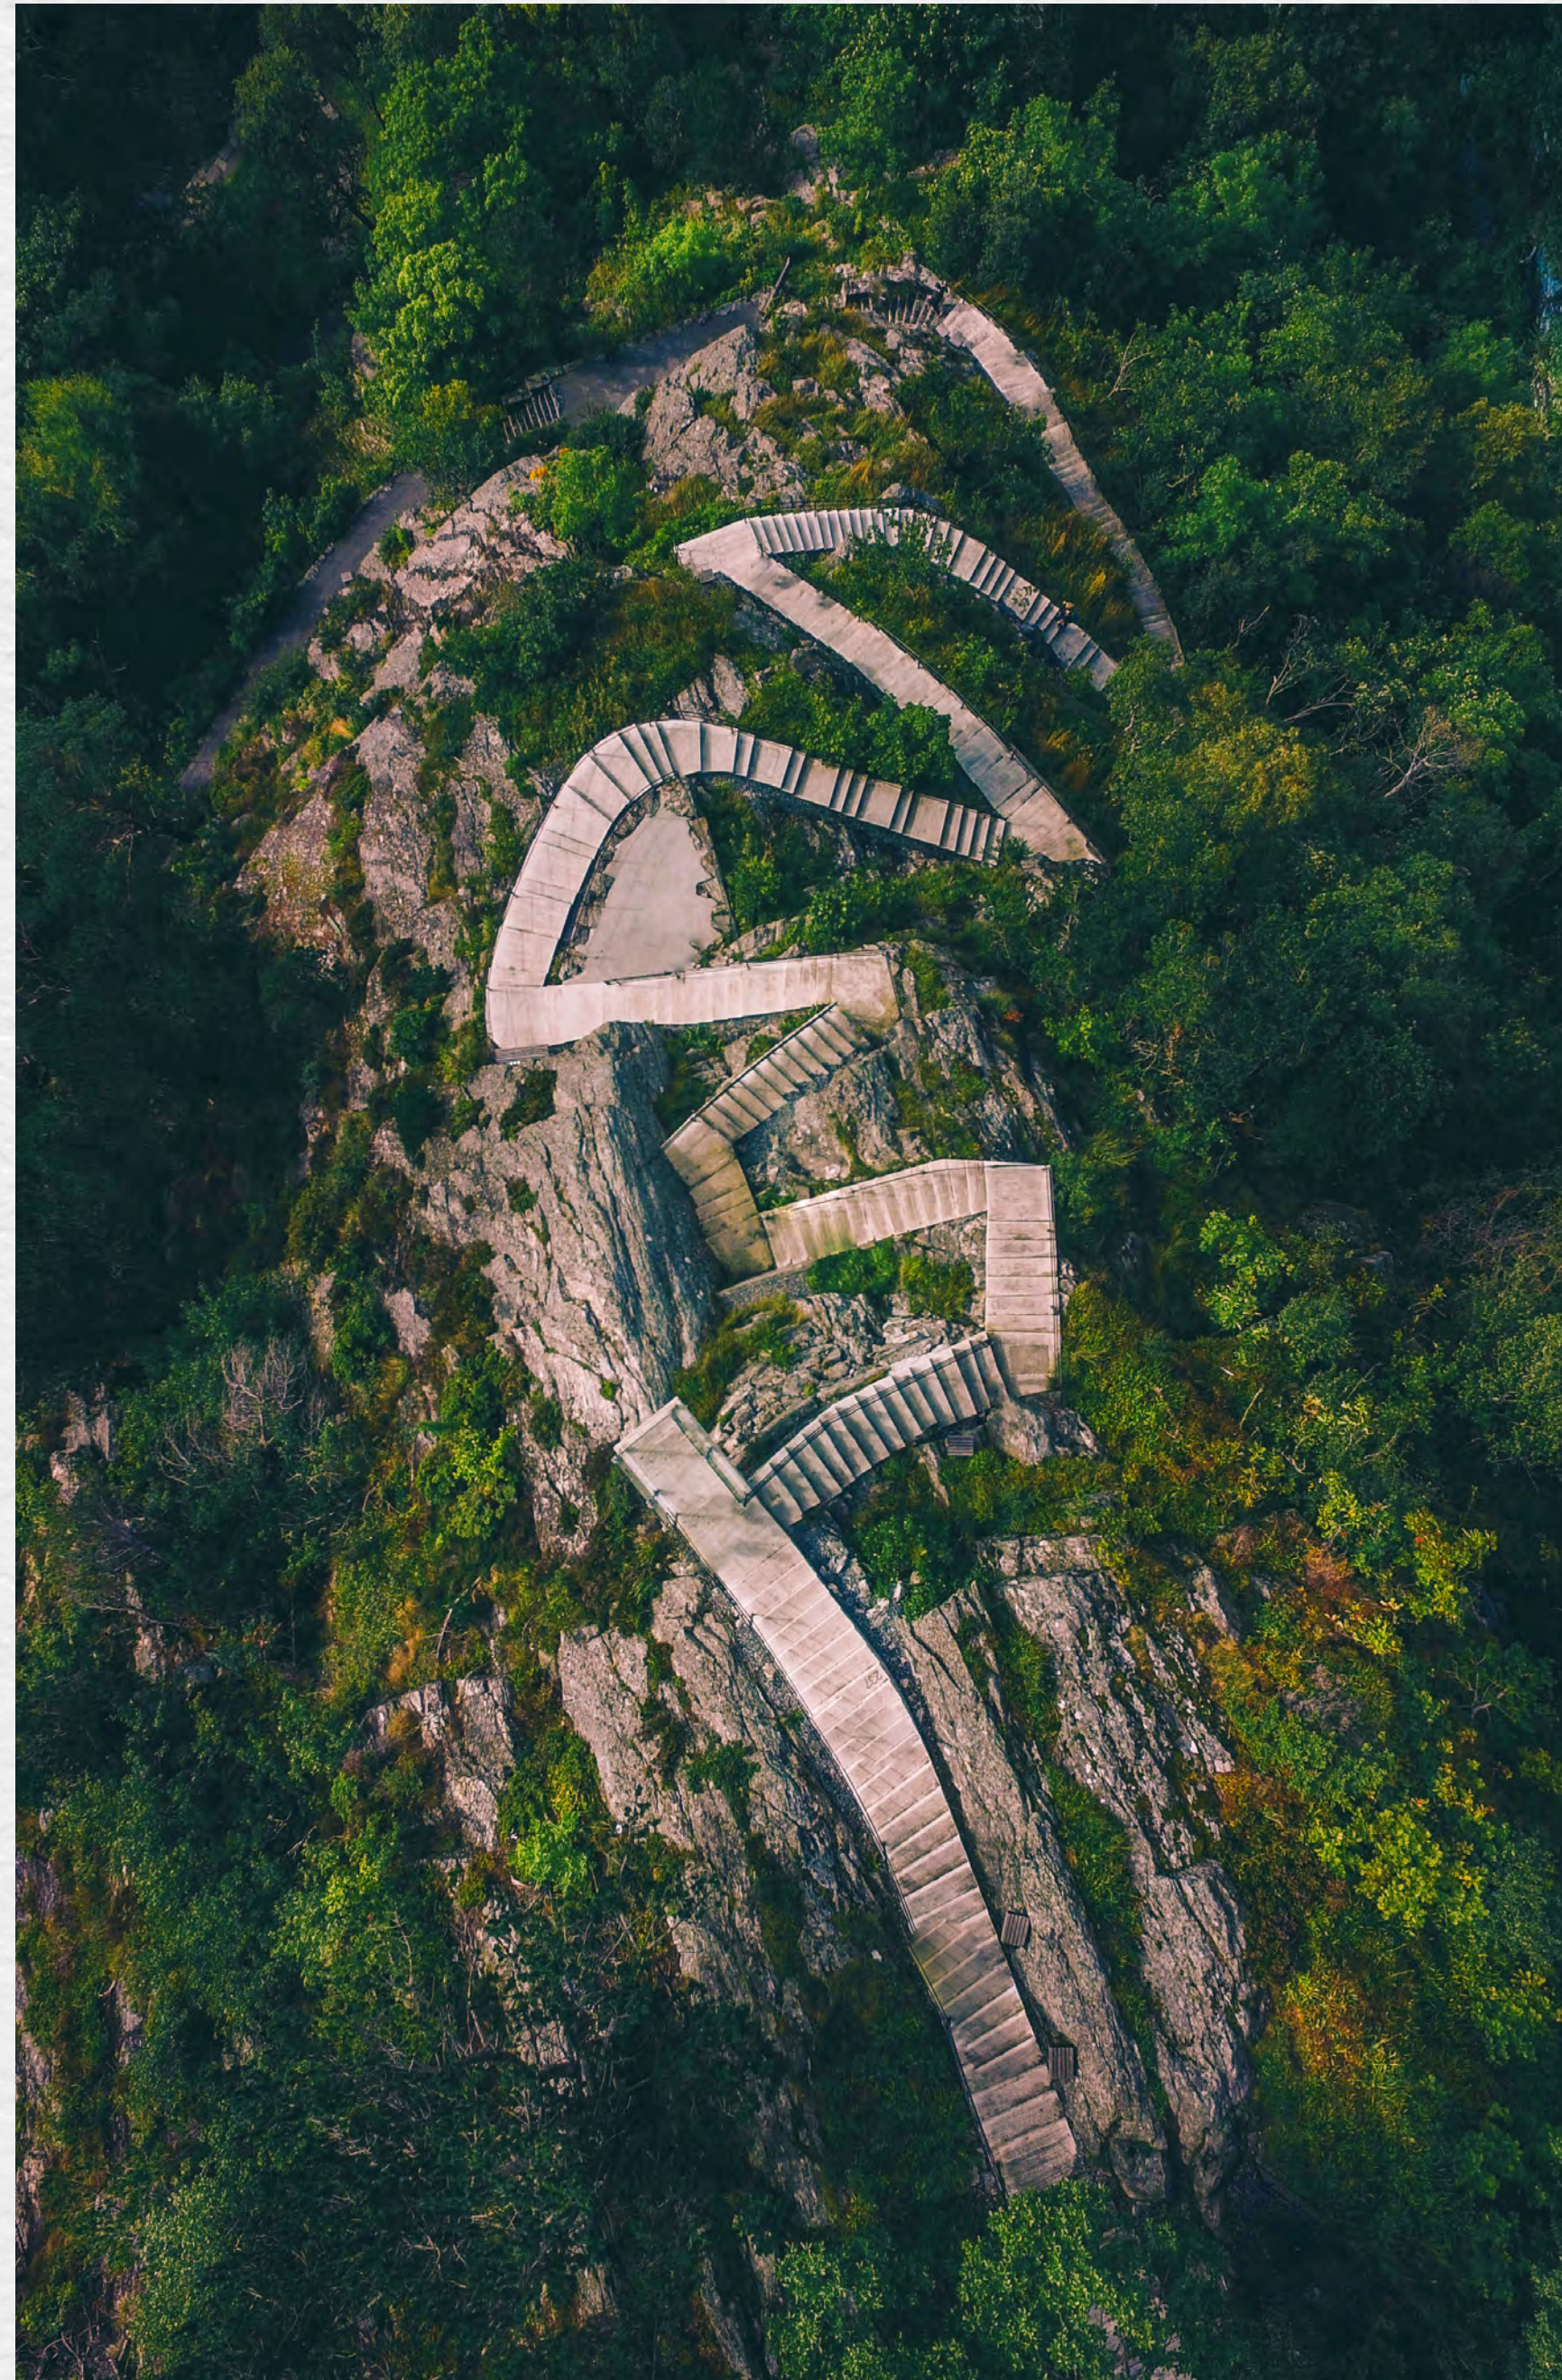

Every piece of furniture we create tells a story, a perfect blend of aesthetics and utility. For us, furniture is not just a practical object; it's a piece that inspires, even when simply admired.

Do it different.

Mission.

More than just a design studio, we are your partner in reinventing your spaces, both interior and exterior. We create bespoke furniture designed to seamlessly integrate into your projects, whether it's complex furniture, subtle decorative touches, or works of art.

With our expertise, creative mindset, and exceptional partners, we craft unique pieces that bring an extraordinary dimension to every project. Together, let's shape environments where art and functionality meet, creating unique and inspiring living spaces.

Got style ?

**Our
expertise.**

Design of exclusive furniture.

Express your uniqueness through one-of-a-kind pieces, designed and crafted according to your specifications. From the sleek lines of the sofa to the sophisticated design of the sideboard, each element is a functional work of art. Every piece is made with fine materials and meticulous finishes, ensuring a result that is both aesthetic and durable.

But that's not all...

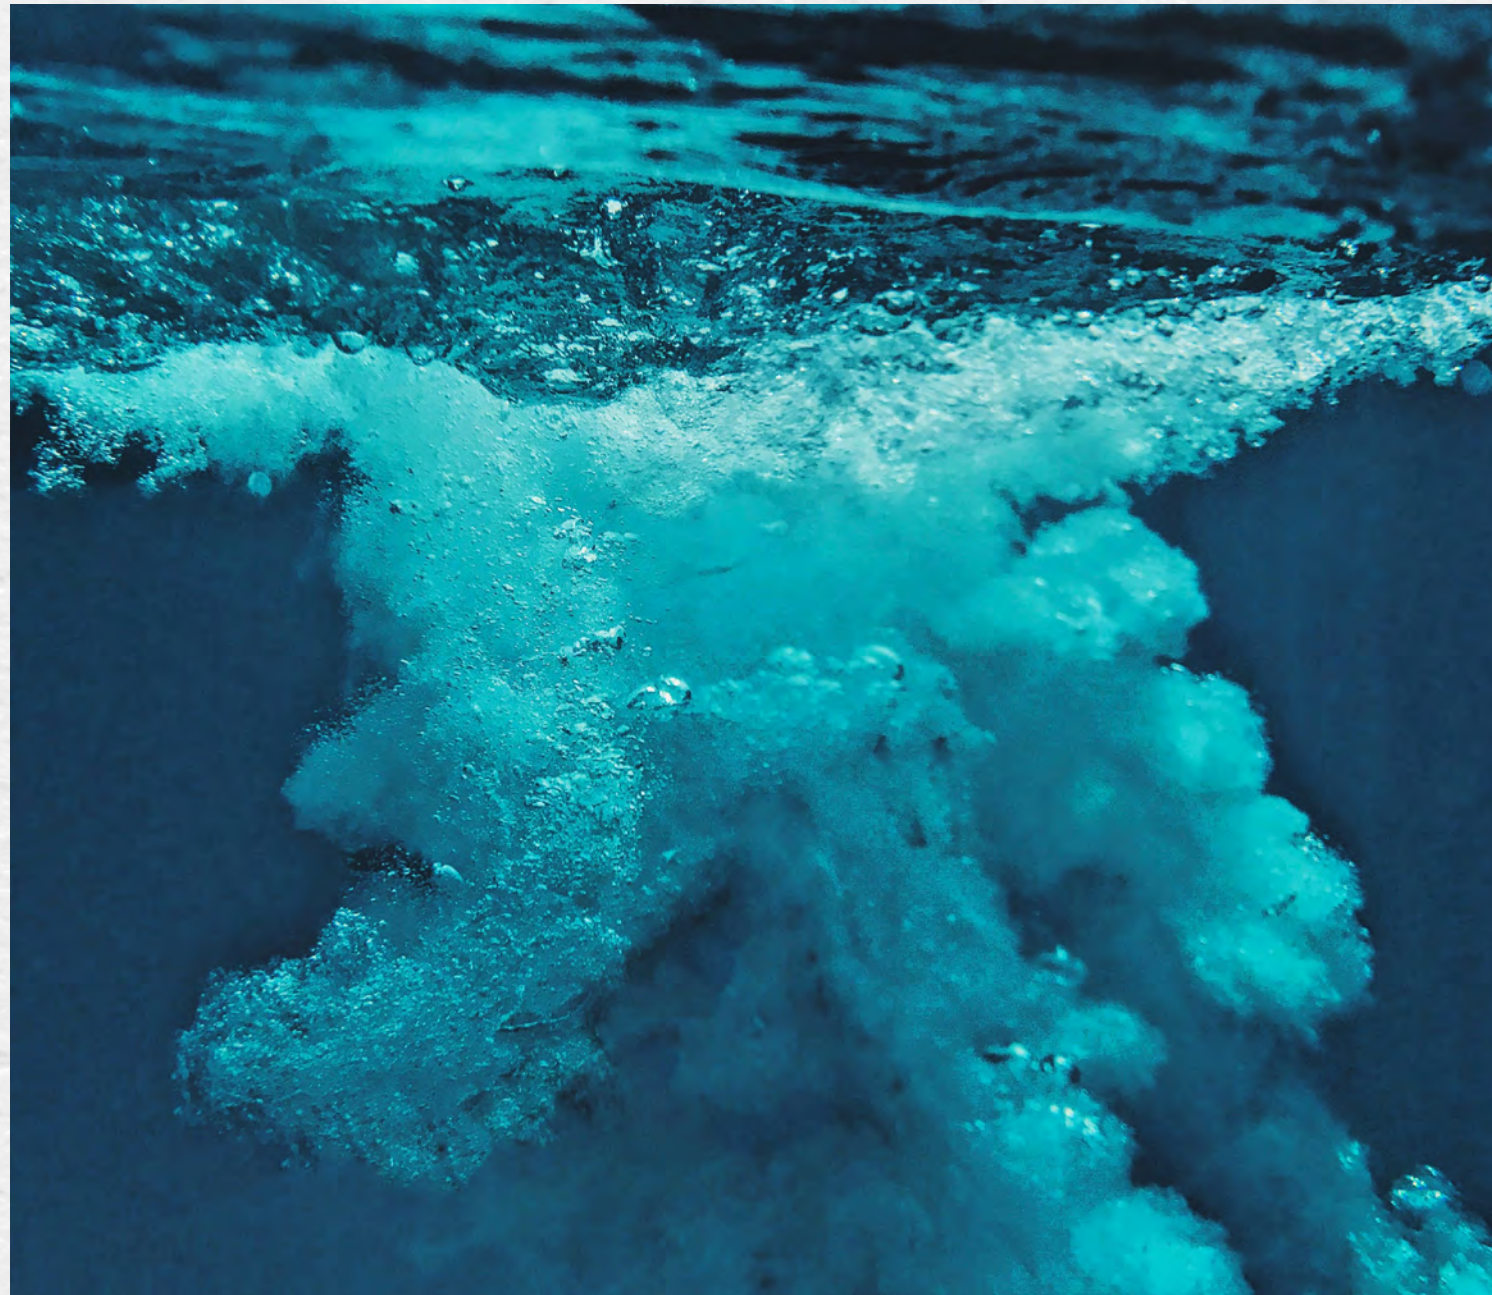

Interior & exterior design.

Redefine your space with our expertise in interior and exterior architecture. Whether for your indoor or outdoor spaces, we create harmonious atmospheres that highlight every detail.

A holistic

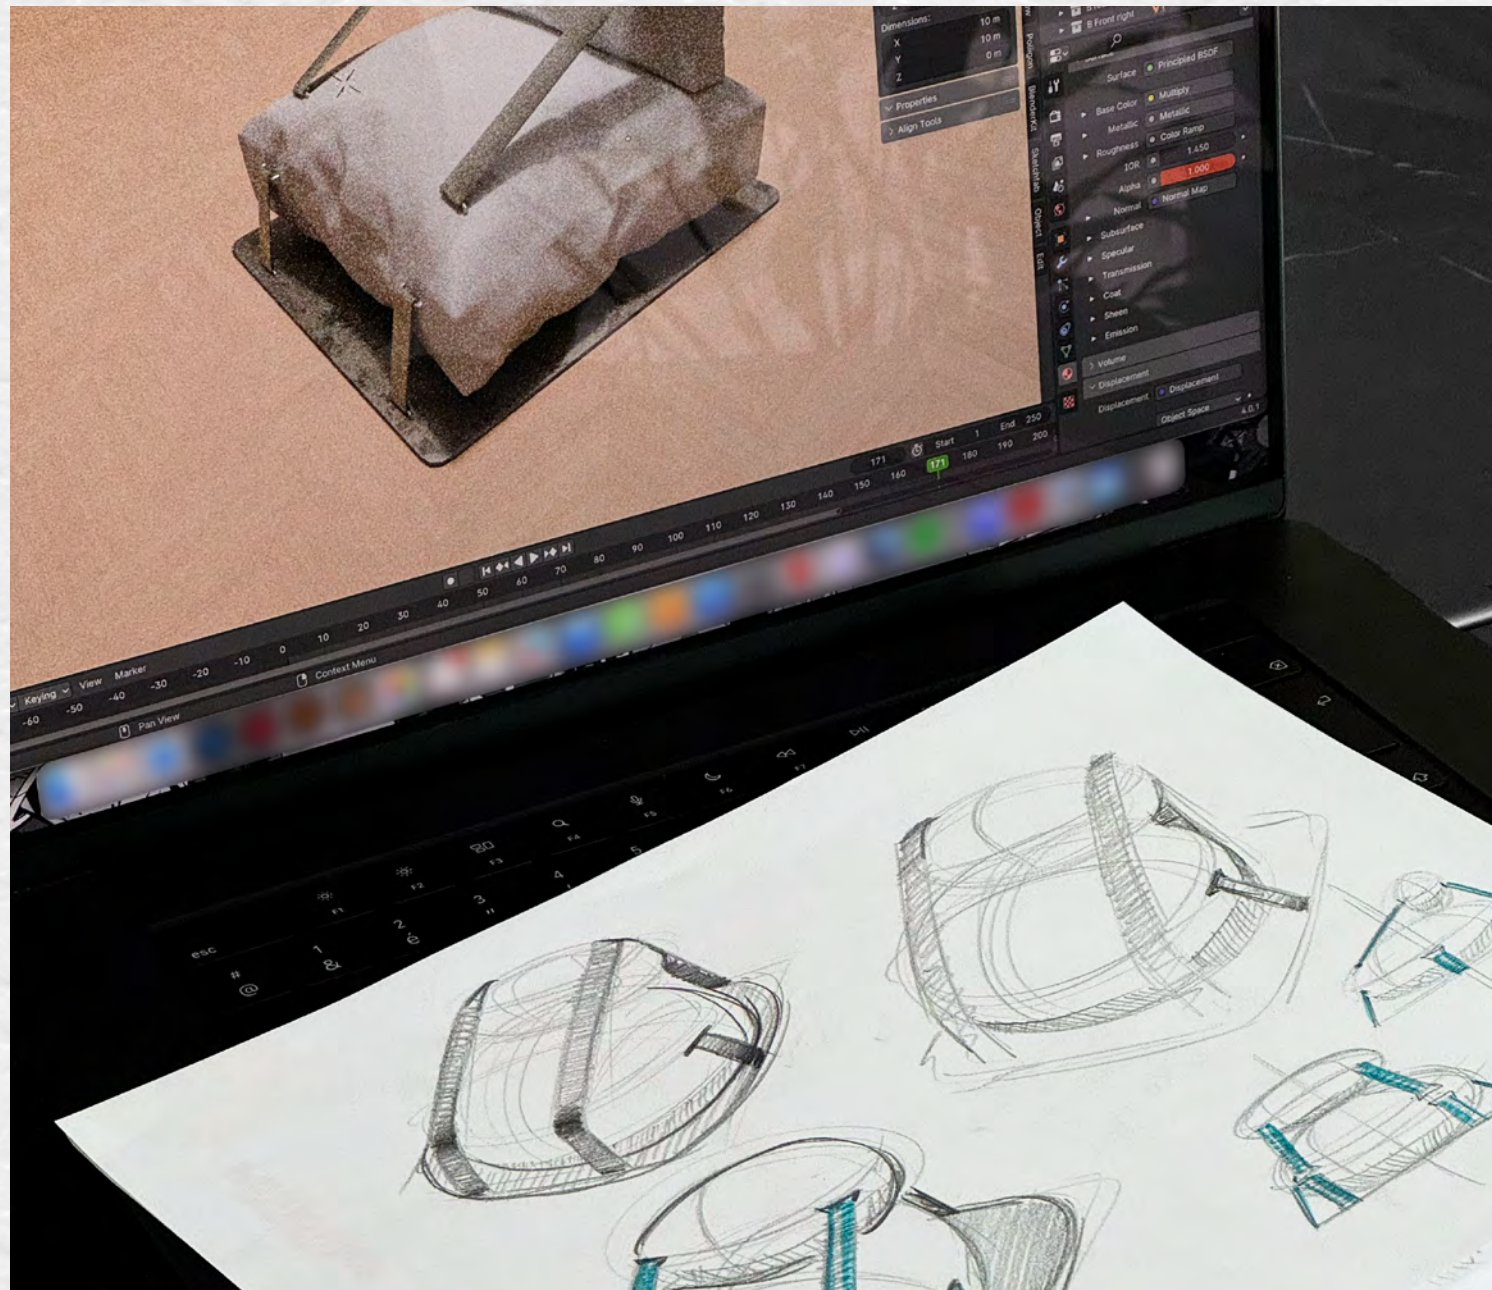

Approach

for an exceptional result.

Immersion.

Before designing a project, it is essential to fully understand your needs, challenges, context, as well as your expectations and motivations. This allows us to define a clear direction and structure the project in a way that delivers a relevant result.

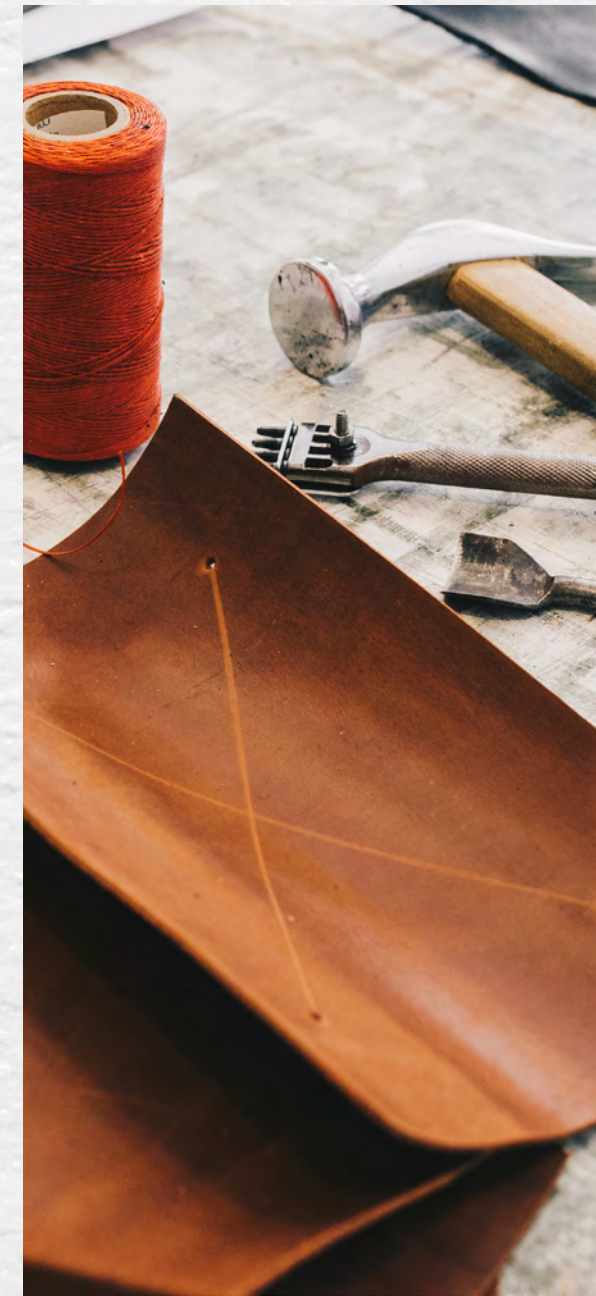

Creation.

The magic happens! Based on our analysis, we unleash our creativity by exploring a range of ideas through sketches, digital tools, and 3D modeling. The goal? To create a unique solution that perfectly aligns with your vision.

Colors & trim.

"Color and trim" is just as crucial an étape as the design itself. This is when the choice of materials is decided, whether it's colors, materials, or textures. Far more than just integrating the piece into the environment where it will be placed, these choices are essential for conveying emotions and profoundly influencing the perception of the piece.

Execution.

Once the concept is selected from our proposals, we will collaborate with trusted artisans and partners to bring your project to life. Throughout the process, we will ensure that impeccable quality is maintained.
