Perm	Water	Product	Description	Uses	Manufacturer(s)
Y	N	E6000 FabriFuse	Adhesive for general wood, glass, metal, rubber, and fabric applications	Creates a bond for general fabric applications. The extreme flexibility, stretch and recovery won't create bumps or bulges on fabric and will allow fabric to remain flexible—even after washing. It bonds permanently, dries clear and is acid-free with almost no odor. Will adhere rhinestones and trims	Eclectic Products, Inc.
Y	N	**E6000 E600 Fray Lock E6000 Jewelry & Bead E6000 Spray E6100 Extreme Tack	The self-leveling adhesive forms a powerful bond with most any material and will remain flexible once cured. E6100 has all of the strength of E6000 but this non-sag formulation won't slump or run Extreme Tack allows you to make your own glue dots! It dries tacky for repositioning	2X stronger and 60X more flex than Polyurethane! Chemical resistant – safe for applications exposed to dilute acids and dilute caustics Waterproof. Washer/Dryer safe. Paintable – paint to match surrounding area to make UV-resistant. Temperature resistant – unaffected by extreme heat or cold once cured Flexible – excellent for bonding items subject to vibration	Eclectic Products, Inc.

Perm	Water	Product	Description	Uses	Manufacturer(s)
Y	Y/Wet	**Elmer's School Glue	A PVA (poly vinyl acetate) glues which tends to stay more flexible after drying (more like latex) and dries somewhat faster	Attach items to paper, wood, cloth, and more Specially formulated to be washable and easy for kids to use, this glue is perfect for school projects and home arts and crafts. Its white color serves as a great base for slime.	Elmer Parent Newell Brands
Y	Y/W	**Elmer's Glue All	Permanently attach items to paper, fabric, wood, ceramics, leather, Bonds strongly and dries quickly, and can handle kitchen repairs, workshop and garage work, and other demanding applications.	Glue All is a stronger adhesive suitable for various materials, while School Glue is primarily designed for paper and light craft projects Very good for attaching fabric to cardboard to make boxes	Elmer Parent Newell Brands
N	Y	**Glue Sticks	Designed to glue paper and card stock together, and are not as strong as some liquid-based variants. Quick temporary use to hold fabric in place.	They can be used for craft and design, office use and at school. <ul style="list-style-type: none"> <li>• Dylusions Creative Dyary Mini Glue Stick</li> <li>• Uhu Permanent Glue Stick</li> <li>• Avery Glue Stic</li> <li>• Fabric Glue Stick</li> </ul>	<ul style="list-style-type: none"> <li>• Ranger</li> <li>• Uhu - Bolton Adhesives</li> <li>• Avery</li> <li>• Quilter's Select</li> </ul>

<b>Perm</b>	<b>Water</b>	<b>Product</b>	<b>Description</b>	<b>Uses</b>	<b>Manufacturer(s)</b>
N	N	**Glue Gun Sticks Two types of glue guns: Low Melt (low temp) Hot Melt (high temp)	Types of glue in glue guns are: PA (Poly Amides), EVA (Ethylene Vinyl Acetate) and APAO (Amorphous Poly Alpha Olefin)	PA for bonding textile fabrics because they have good resistance to dry cleaning fluids. Other important applications include furniture assembly, shoe making, automotive assembly, and gas/oil filter bonding. EVA is used in the paper, packaging, and assembly industries, as they bond to a variety of cellulosic materials. APAO used in the packaging industry, especially for case and carton sealing applications.	Surebonder  Gorilla Glue Company  There are a lot of manufacturers for these.
Y	N	PUR Hot Melt	Polyurethane reactive glue, or PUR, is a synthetic material used frequently in volume manufacturing and home repair.	Used for book binding, packaging, woodworking and construction.	There are a lot of manufacturers for this.
