

Morning Visual Schedule

Directions:

- 1. Cut out the visuals that match your child's morning routine.**
- 2. Laminate or cover them with clear tape to make them more durable and long-lasting.**
- 3. Attach the visuals to the schedule using Velcro dots or tape so they can be easily moved and adjusted as needed.**
- 4. Introduce the visuals to your child so they become familiar with the images and their meanings. For example, show your child the toothbrush image while they are brushing their teeth or while reading a book where a character is brushing their teeth.**
- 5. Place the visual schedule in a location that is easily accessible for both you and your child.**
- 6. Start simple by using three key images that represent the most important parts of the morning routine. As your child becomes more comfortable, you can gradually add more visuals.**
- 7. Make it interactive by encouraging your child to move each completed task to a "Done" section using the Velcro dots or tape. This may require some initial guidance and teaching.**
- 8. By using this routine consistently, your child will gain independence and confidence in completing their morning tasks!**
