

ABOUT US

In 2008, Polymatic Pneumatic India Private Ltd started its journey with just five passionate individuals, dreaming of bringing top notch pneumatic products to India without breaking the bank. We started small, focusing on essentials like one touch fittings, FRLs, and valves, all crafted with the latest designs.

As the years rolled by, our commitment to quality led us to introduce pneumatic cylinders in 2010, all proudly made to meet ISO standards. Thanks to our innovative seal designs, our pneumatic cylinders quickly won hearts and carved out a significant slice of the Indian market.

Besides our product line, we believe in being right where the action is. That's why we've always been active participants in industrial fairs, constantly learning and evolving to meet the dynamic needs of the pneumatic market.

But it's not just about what we offer it's how we offer it. Our strong network of domestic dealers and a dependable service team ensure that every customer gets nothing short of exceptional service.

We're all about staying connected and staying ahead. Our marketing and sales teams, along with our distributors, are constantly in sync, exchanging valuable information that helps us tailor our offerings to exactly what our customers need.

Looking ahead, we see a future where pneumatics will blend seamlessly with electronic and digital controls for automated systems. Think terminal valves, vacuum ejectors, electro pneumatic pressure regulators, and electrical actuators all coming soon with cost-effective sensing and information processing devices, making your systems smarter and more efficient than ever.

At Polymatic Pneumatic, we're not just about products; we're about warmth, innovation, and making pneumatic solutions accessible and delightful for everyone

PNEUMATIC CYLINDERS
