

Formation of Gabriel's necklace incarnated through 12 bearers

The text that follows comes from the book, *The Archangel Gabriel Biography...* on pages 259 and following.

It is the path of the Archangel Gabriel and therefore of water.

The message is simple: by taking care of the water, of the Angel of water, of the Archangel and of the Divinity of water, man rediscovers the mirror of heaven that allows him to dialogue with his soul. In this mirror of conscious divine water then appears the will of God for man, that is to say the original man willed by God.

The task of mortal man is to welcome this will and to conform himself to it. For this, he must enter into an education that will lead him toward immortality and not toward mortality.

It is the path of the reconstruction of the body of man that was opened by the Archangel Gabriel through the water, the statue, the necklace and now through the 12 bearers. These 12 bearers are the legs of humanity and the heaven of the earth with all the cosmic influences organized in the Light of the superior divine Intelligence.

In ancient wisdom, this science of the 12 bearers was known as astrology, that is to say the art of governing oneself and of governing a people in harmony and peace.

It was a true adventure that was beginning, for, year after year, with each new concrete realization of the Essenes, a new organ was going to appear.

Thus, the body of the original man in the will of God could once again be reconstituted identical to the ancient Mysteries of Osiris or of Christ.

The annunciation of the New Man

In January 2007, the Archangel Gabriel asked Olivier Manitarra through a ceremony that he transmitted to him to consecrate 12 pillars to bear his School of God on the earth. These 12 servants of the Alliance, assembled around the source of the Father of water, were to embody, in time, the 12 pearls of his necklace on a magical and living plane.

They were to progressively give a body to the Angel-Father who corresponds to their function, to one of the 12 guiding virtues of the School of Gabriel and of the Round of the Archangels: the Angels of Truth, of Love, of Wisdom, of Openness, of the Hidden, of Communion, of Equilibrium, of Individuality, of Justice, of Universality, of Peace and of Purity.

During the celebration of Gabriel, 12 pillars were therefore consecrated to these 12 Angels. These pillars form the magical circle of the 12 organs of the body of the man of Light to be born within the Essene Nation. They are destined, in time, to be the bearers and the crucible of a true School of Gabriel on the earth.

As the Archangel had announced, the Circle of the 12 made it possible to make appear, on the magical plane, the legs of the New Man, the legs of the body of Gabriel in incarnation on the earth.

A heavenly wink

In 2007, during the ceremony of consecration of the 12 bearers of the School of Gabriel, each of them was united with one of the 12 Angel-Fathers of the necklace of Gabriel. These Angel-Fathers each have 12 Angel-sons. The totality of this structure of Light constitutes a circle that stands around the presence of the Sun I-Am. This circle is active, living and it animates the whole heaven of the Essene Nation. It represents the will of God on the earth.

As soon as this consecration ended, a clear and surprising sign appeared in the sky above the place where it had taken place. It was pitch dark and the full moon was shining, high in the sky. All around it, for miles and miles, there stretched a perfect circle of light. It was not a halo of light as can sometimes happen in foggy weather, it was a fine and precise circle, the center of which was the moon. This immense circle had been drawn as if by magic, traced in the sky by an invisible hand.

The function of the 12 Pearls

The 12 bearers of the necklace of the Archangel Gabriel are guardians of the Round of the Archangels and of the collective being that must appear within the Essene Nation, like the body of the Light. They must allow the blue heaven of the Archangel to be permanently present and activated above each bearer of Angel and watch over the presence of peace and equilibrium in all relations. Their role is to protect the Angels. By its way of being and its acts, this circle must draw upon the invisible doors the magical seals that glorify the Light and stabilize it on the earth.

Father Gabriel said:

“I want men to know Gabriel, for they have never known him”

and, in the end, he wants to reveal himself through a source and through 12 bearers who surround him.

These 12 bearers are a crucible, a cup for his source and his Teaching, which must flow into the world. They are 12 particularizations, 12 organs of this luminous and pure being and they must be at the service of the global body. The 12 Angel-sons who stand behind each pearl of the necklace are, for their part, at the service of their Angel-Fathers. This organization, this sacred structure, truly forms a body on the earth.

Gabriel is the one who gives a body to the Light and allows it to live. He is also the one who takes care of God. Thus, this circle of 12 bearers must take care of the Essene Nation, of the Round of the Archangels and of what must be inscribed as highest through this work.

They have responsibility for the bearers of Angel. Everything that enters the Round of the Archangels must be correct, pure. Gabriel is discipline and also absolute purity. He never wants stagnant water before his temple. He loves pure life, pure water.

The 12 bearers are the blue heaven of the Archangel Gabriel. They form the magical water, the placenta, the matrix, the angelic zodiac. The bearers of Gabriel's necklace are guardians of doors. They must open and close the doors so that the angelic world may be in victory. They are protectors of the Angels, guardians of purity. Purity must be absolute in the Round of the Archangels and in the Essene Nation. This is a magical but also a concrete function. Purity must be living in the intention, in the magical world, but also in the act through discipline, in the concrete world. Discipline is the putting into practice of the Teaching, the respect of the Teaching and the respect of God. By protecting the bearers of Angel and by making discipline living, the 12 bearers make all these virtues live.

It is the role of the 12 bearers to make the importance of the Angels and of the pure approach, with pure concepts of the world of the Angels, become conscious so that the Light may become powerful in the Round of the Archangels and the Essene Nation.

The 12 bearers of the necklace are an organ of perception for the Archangel Gabriel, but also for the whole world of the Archangels, which thanks to them can draw near to the world of men and understand certain of its mysteries.

The constitution of the Circle of the 12

In December 2007, Olivier Manitaro laid more deeply the foundations of the constitution of the Circle of the 12 pearls of Gabriel's necklace, which he transmitted to his students and friends in his monthly letter.

In France, the Essene Nation is becoming stronger and stronger thanks to the commitment of those men and women who bear the rope of the Round of the Archangels. Last year, during our celebration of the Archangel Gabriel, he asked us to consecrate 12 pillars who were to surround his source and bear his School.

These 12 bearers are the guarantors of the passage of the Essene Nation toward a higher world. They are particular bearers of Angel, linked to the School of the Archangel Gabriel, and must make of their life the victory of the virtue that unites them with the Angel.

Thus, they become living doors activating themselves so that the Essenes may pass through them and thus have access to higher worlds, which without this work remain closed to them. Man cannot do everything alone in life. Wisdom has made the individual dependent on the community to show the secret of love, solidarity, mutual support. She told the community to take care of the individual and asked the latter to take care of the community. Such is the equitable and harmonious exchange.

The 12 pillars assembled around the source of Father Gabriel are guarantors. They are the proof that the Essenes have understood the wish of the Father and are putting into work his Teaching, his living wisdom.

A people is like a house: it must be set on solid foundations. It is the whole community that is blessed by the Light of beautiful and useful life.

These 12 pillars are a writing, a living and magical symbol. If their work is worthy of the world of the Angels, then the seals of the zodiac can appear, which are the sacred signs opening the doors of destiny, of positive influences, of right, precise, effective directions.

They then free the Essene Nation from the animal zodiac and replace it with an angelic zodiac.

Those upon whom these seals appear are consecrated priests and mages, who receive the power to set in motion the cosmic and divine laws and the influences of healing and protection.

At all times, this science has been studied and known among all peoples and all traditions. Today, it is to us, the contemporary Essenes, that it is revealed.

It would be for me a real happiness also to consecrate in Quebec 12 priest-magicians of Gabriel who could bring their influence over the Essenes of Quebec and over Quebec as a whole. Of course, they will then have to follow the complete trainings in order fully to activate their priesthood and their angelic alliance. This is a priesthood specific to the School of Gabriel in the Essene Nation.

The first circle of 12 pillars was consecrated during the celebration of Gabriel in January 2007, a little “in urgency.” We are in the process of laying the first steps of this magnificent work, the elements of which are given to us by the divine world as our works advance.

This year, the School of Gabriel has only just opened its doors. But when 12 pillars are consecrated and correctly formed around the source and the temple of Father Gabriel, then the passage can take place.

It becomes possible for man to enter into the world of the Gods, who are the 12 words of eternal wisdom, the 12 commandments of the life of the man who walks toward the perfect reconciliation with the Father. Following the application of these 12 commandments, man becomes a servant of the divine world - an Essene - or an unbeliever.

When we consecrated the first statue of the Archangel Gabriel, we placed around his neck a necklace of 12 pearls. This statue has since remained permanently at the sacred source of the Essene Village of France. It is this necklace that we bring with us to each new celebration.

This necklace of 12 pearls was the beginning of the path that was to lead to the consecration of 12 pillars, several years later. We must now consecrate 12 pillars here, in Quebec, who will bear the School of the Archangel Gabriel. It is a whole organization.

These 12 pillars are the 12 pearls of the necklace of the Archangel, the 12 doors which are the Angels allowing the Essene Nation to have the 12 organs of the perfect body of the year, through its 12 months. It is the complete cycle of the Round of the Archangels through the celebration of the 4 Archangels who unite in one year.

France, Quebec, Gabon or other countries that will join the Essene Nation are each an autonomous body or an organ of a greater body. In each body there exists a specific structure, and each is constituted according to what the country and the people offer as possibilities of working or not for the Light.

The Essene Nation is a divine structure that can and must be adapted to each country as to each individual, family, community. What is realized in each country must belong to the being who governs the country in the Light and who takes care to lead the people toward the Father.

Here, in Quebec, the Essene Nation has been welcomed by the being of the Maple. This being is the Master of the land of Quebec and its wisdom belongs to the inhabitants of this land, who form a unique people, different from all other peoples.

We, the Essenes, do not want to go toward a standardization of consciousnesses and beings. We want to respect the differences, preserve them and lead them rejuvenated and accomplished toward the Father.

It is the feast of all colors, of all cultures. Every work accomplished for the divine world or for the world of men must be done in accord with the land and the spirit of the land of the place. What is done in another country must be done for the land of that country. In the divine world, the Earth is one, but in the world of men, this is different. All our works must regroup and unite in a higher dimension, for if each country must be and remain an independent entity, it becomes a living organ in the nascent body of the new revelation of the Essene Nation.

Then, in a near future, 12 countries could assemble to constitute a broader alliance, in the image of Europe or of the United States. This would be the concretization of a living symbol, of an acting entity that could truly radiate what is pure and true toward the whole world, the soul of all the peoples of humanity and of the earth.

The circle of the 12 Quebec pillars around the source of the Archangel Gabriel is a march, a step toward this realization.

In his monthly letter of January 2008, Olivier Manitaro further clarified his teachings on the 12 pearls of Gabriel's necklace and the angelic zodiac as well as on the science of Gabriel's placenta:

The Archangel Gabriel is the Father-Mother of childbearing and birth, for he is the placenta of life. It is he who directs all the intelligences, influences and forces at work toward birth. The body of man is a condensate of influences which manifest themselves in order to engender other influences and to make another body be born.

Man spends his life meeting beings, circumstances, influences and cannot remain insensitive. He is permanently in a movement of energy, a sphere of living matter, a placenta within which he is formed despite himself. Upon this placenta act all kinds of influences that come from the cosmos, from the sphere of men or from nature.

Every man, whether he is a Master, a mage, whether he has awakened his consciousness and knows and applies the laws or not, is necessarily influenced by the beings, things and circumstances he meets. The Essene, the one who awakens his consciousness and walks on a path of Light, must know and meditate upon this law of universal magic and of the placenta, which allows birth and rebirth.

You were born and you will be reborn. In the meantime, you are preparing the new body, whether of darkness or of Light. Magic is the science of influences. It is independent of man because it is it that sets the laws in motion and makes them act. Man possesses within himself the power to activate magic, but he can also be activated by it.

Magic is universal, it is what allows and directs birth in all the worlds, for it organizes the placenta of life. The Essene who studies the laws and the secrets of magical art must awaken his consciousness in absolute purity through all his organs and all his senses in order to recover the power of magic that is in him and that belongs to him before destiny.

If man abandons his power, other intelligences and influences seize it for his salvation... or his loss. It is through acts that the presence of consciousness must live, for an act is an influence set in motion and possessing a power of fecundation over the placenta of life. Thus the bodies are elaborated, receptacles of influences.

An act accomplished by an ordinary being who is not truly conscious of the power of his being will not have the result that he expects, even if his act is magical. On the other hand, he who brings all his attention, his concentration upon the potential act that he bears within himself, in the subtle spheres of his being, becomes powerful on the earth. This is the secret of magic and of sacred priesthood. A priest is a servant of the divine world. He knows the laws of the ancient Tradition and applies them scrupulously. It is the Teaching and the direction of eternal wisdom that protect the

priest from tempting influences. An Essene priest inscribes himself in a tradition that bears the Alliance of the Eternal on the earth and in humanity from century to century. It is a framework offering a blessing, an orientation, a protection, a destiny. It is a placenta opening a path and determining the future by the creation of a determined body.

The 12 bearers of the School of the Archangel Gabriel are the guardians and the animators of this divine placenta, of this sacred and pure matrix. This matrix takes root in the Round of the Archangels.

The 12 are the protectors of the family of the Angels on the earth. The Essenes engaged concretely as bearers of Angel have as their aim and duty to make the Angels live in the world of men and of the Mother by offering themselves as living earth for the rooting and the fructification of the Light. Thus goodness, harmony, peace, intelligence... can live on the earth and manifest there in the midst of men in truth, magic, mutual support.

The Round of the Archangels finds its fulfilment in the concretization of the Essene Villages. It is the structure of Light of the Essene Villages, just as the 12 bearers are the structure of Light, the etheric body of the Round of the Archangels. They themselves were born from the temple of the source of our Father Gabriel, who in the world of men is the mouth and the word of the Father of the contemporary Essene Nation.

Thus, the role of the Essenes is to realize the Essene Villages as a Holy Land, a divine placenta in which they can live as Essenes and activate the Angels, the Archangels, the Gods and the Father in the mystery. It is a divine work, an incarnation of the Word, the creation of a body, of a vehicle. From this a tradition, a culture, a new way of being in the world must be born. It is important that each Essene meditate upon each seed of this wisdom and set himself in motion to participate in this work which will become real in the world of men by the strength and determination of those men and women who aspire to realize it.

I am speaking to you of a birth, of a rebirth and of the secrets of the Phoenix and of the Bennu Bird.

All the deep mysteries of reincarnation and resurrection are contained in this sacred hieroglyph. Only a consecrated Essene can understand such secrets, for it is his Tradition that teaches him directly beyond the words and limited concepts of the world of men. The practice of the Round of the Archangels opens access to such a teaching and to such a revelation.

The 12 bearers of the School of the Archangel Gabriel must be initiated into these secrets of the Bennu Bird, into the mysteries of the placenta and into birth and rebirth.

An Essene draws his strength from the symbols of his Tradition. He is a tree that unites heaven and earth. The source of Father Gabriel, as well as the 12 bearers, the Round of

the Archangels, the Essene Villages that proceed from it are living and eternal symbols that have been activated on the earth in our time by a group of awakening Essenes. To set in motion symbols and forces animated and nourished by the power of consecrated man, such are the greatness and the responsibility of the one who comes onto the earth. Do you come to make death and nothingness live? Do you come to place yourself at the service of life and of what is eternal in you and in the world?

An Essene has chosen his camp, he is an awakened one. Then his strength, his greatness and his responsibility are to place himself at the service of the Light and of the life of the Father in order to make them live in the world of men. This is done by the activation of the placenta. It is in this placenta that the body of the Light, the body of the Essene Nation on the march can be formed.

This body is that of the glory of the Father. Thus, when the initiatic and alchemical Tradition spoke of the “body of glory” or of the “resurrection,” it was an allusion to the mysteries of the Bennu Bird and to the constitution of the people of God on the earth. This people who takes care of the mysteries of the Father in its midst activates the placenta and becomes the Mother of God on the earth through the lineage of the Masters.

This is the great secret of the Essenes. Its realization passes through the temple of Father Gabriel, the Circle of the 12, the Round of the Archangels, the Essene Villages and the practice of our sacred Mysteries in their protected enclosure. Through all this structure is activated the divine placenta, the true matrix of the Light. Meditate upon this wisdom and enlighten it with the presence of your Angel, with the discipline of the Round of the Archangels and make it intelligent in your own daily life. May your acts, your gaze, your words, your thoughts be filled with an Essene consciousness. This consciousness knows that through your acts, your attitude of life, your behavior, you set in motion symbols, intelligences, beings that do not belong to you, that are independent of you, but to which you give power by animating them through your will, your thought, your word and your acts.

Magic is the only means of directing one’s life in consciousness, of orienting one’s path and of realizing on the earth. It is the consciousness of exchanges and the mastery of influences within the placenta of the Light or of darkness. This placenta is everywhere, it is omnipresent, it is life itself, the ocean of our Father Gabriel.

This water is a mystery that must be studied by the Circle of the 12 and by the Essenes in general. It is the Soul of souls, an intelligent and acting fluid that embraces all and bathes all. It is a sacred breathing and the means of all exchanges, the vehicle of all influences. It is a bond of life that has organized itself, but which can also be disorganized. It is the nourishing earth of all thoughts, of all states of soul, the forces in the will. But it is also the physical earth as we know it, for without this water, without this soul, nothing would exist in any world. The magical water of Gabriel is the

universal substance, the true matter before all creation and also during it. When an object is born in it, it acquires a soul, a magical breathing and conquers an influence over it. It is colored by it and acts upon it. Man born of this universal soul acquires a soul himself and can act through his thoughts, his feelings, his will, his acts. He thus imprints directions, orientations in this common soul of the worlds. The nature of what he begets determines what he is and also his future, his destiny.

All sorts of beings and worlds live within this substance. Each tries to capture territories in order to make his power and his influences grow. They succeed by approaching worlds and reducing them into slavery. These are the powers of darkness and of deceptive light.

The Essenes must not unite with these worlds, but place themselves at the service of the Father of life and of the Light of truth which engenders the Angels and therefore the Round of the Archangels and the Essene Villages on the earth. Inside this structure, the Essene is protected, for it is a living symbol, a holy writing which lives in this soul and activates the sacred placenta of the Mother, the one which allows the birth or the rebirth of the Light.

The 12 bearers of the School of Gabriel are linked to the 12 signs of the zodiac, which represent the cosmic forces governing the destiny of every living creature. Every being has these 12 doors in his soul. They place him in relation with the world of death or of life, according to the influences activated upon his path and all around him in the ethers. As soon as a soul enters into the matrix of the zodiac, it acquires a body and clothes itself with a destiny, with a mission. He who has a body must form another body for himself. For this, he must unite himself in consciousness and in acts with the cosmic Intelligence. It is the nature of the bonds and the exchanges that determine the future body.

He who lives unconsciously thinks that he lives for himself, but in reality he lives for a world around him that he does not see. This world steals his life from him without his even noticing it. The goal of life is to form for oneself a new body through the activity of the first body. For this, one must make the body enter into a structure of Light which links it to the universal and realizes a work of Light and of perfection.

Virtues are doors leading toward the world of the Angels. The Angels themselves are doors toward higher worlds. But it is not only by cultivating a virtue that man will attain perfection and the activation of his being in this higher world. He must set his body in motion in the direction of this virtue, by uniting himself with other bodies for a very precise aim: the victory of a concrete work on the earth that corresponds with the highest conceived Light. Then he becomes a true human being, a conscious and awakened intermediary between heaven and earth. This is why the circle of the 12 bearers of Gabriel, but also the bearers of the Round of the Archangels, must be

conscious of the gestures they accomplish and of the influences they attract into the circle of their life and into that of the Essene Nation.

The Essene Nation must not be a strange curiosity regarded from afar. It is the rebirth of the Essenes, their future body, their Tradition, their space of life, their Promised Land. The bearers of the Round of the Archangels must become conscious of this science of the magical gesture in Gabriel's placenta. By uniting themselves with a higher world, they will be able to set it in motion so as to become creators. Then great will be the result, great will be the Alliance and the power of the Essenes on the earth for the glory of the Father and the good of all beings in His presence.
