

## Stainless Steel Flanged Expansion Bellows

The Stainless Steel Flanged Expansion Bellows from TechnoS Multiline LLC are high-quality flexible connectors designed to absorb thermal expansion, vibration, and slight misalignment in piping systems. Made from premium stainless steel, they ensure strong durability, corrosion resistance, and reliable performance under tough conditions.

Specifications	
Material	High-grade Stainless Steel (Bellows + Flanges)
Design Type	Multi-ply corrugated bellows with braided reinforcement
Connection	Standard flanged ends (ANSI/DIN compatible)
Operating Pressure	Suitable for medium to high-pressure applications
Temperature Range	-270°C to +450°C (varies by grade)
Applications	HVAC, oil & gas, chemical plants, power generation, water systems
