

Stainless Steel Braided Flexible Hose with Swivel Flanges

This stainless steel braided flexible hose features swivel-type flanges for easy alignment and installation. It effectively absorbs vibration, thermal expansion, and minor misalignments, while its corrosion-resistant construction ensures long-lasting performance in demanding industrial environments.

| Specifications | |
|--------------------------|--|
| Frame | Stainless Steel 304 / 316 |
| Hose Type | Hydraulic, Air, Water, Chemical, Steam |
| Working Pressure | 0–350 bar (0–5000 psi) (application dependent) |
| Temperature Range | -40°C to +200°C |
| Finish | Brushed / Passivated / Electro-polished option |
| Applications | Industrial workshops, Hydraulic systems, Air & water delivery systems |
