

WE ARE HIRING

Data Center Technician

Full-time · On-site · Doha, Qatar

TYPE	LOCATION	EXPERIENCE	SALARY
Full-time	Doha, Qatar	2 to 5 Years	Competitive

ABOUT G3HIVE

g3hive is a GCC-based IT infrastructure consulting and solutions company specialising in data center design, deployment, and management. We deliver expert consulting across data center infrastructure, virtualisation, Kubernetes, networking, and cloud platforms for enterprise clients across the region.

Active across the GCC, g3hive is growing its field operations in Qatar to support increasing customer demand for hands-on infrastructure deployment services.

ABOUT THE ROLE

We are looking for a hands-on Data Center Technician to join our team based in Doha, Qatar. You will be responsible for the physical deployment, installation, and basic configuration of enterprise infrastructure. You will work across multiple customer and data center sites within Qatar, so the ability to move freely and independently around the country is essential.

This is a field-facing role suited to someone who is detail-oriented, self-sufficient, and comfortable in live data center environments.

KEY RESPONSIBILITIES

- Unbox, rack, and stack enterprise infrastructure including servers, storage, and networking switches
- Power up and initialise hardware, carry out first-boot checks and basic hardware health validation
- Configure management IPs on servers for out-of-band access
- Apply basic management IP configuration on networking switches
- Perform initial management IP setup on storage platforms
- Carry out structured inter-device cabling between servers, switches, and storage per approved port maps and cut sheets

- Read and execute from rack elevation diagrams, port maps, and structured cabling cut sheets
- Use label printers to produce and apply standardised labels on cables, patch panels, and devices
- Travel to and work across multiple customer and data center sites within Qatar as required

REQUIREMENTS

- 2 or more years of hands-on experience in a data center, infrastructure deployment, or field engineering role
- Working knowledge of enterprise hardware including servers, storage, and networking switches
- Basic understanding of IP networking and ability to configure management interfaces via CLI or GUI
- Comfortable reading technical documentation including rack diagrams, port maps, cut sheets, and cabling schedules
- Physically fit and comfortable in data center environments, including lifting equipment, working in racks, and managing cables
- Must be based in Doha, Qatar and available to work fully on-site
- Must hold a valid Qatar driving licence or be eligible to obtain one. Own vehicle preferred and travel expenses reimbursed
- Able to travel freely within Qatar without restrictions

NICE TO HAVE

- Dell Poweredge Certifications
- Relevant hardware or infrastructure certifications
- CompTIA Server+ or Network+
- Fibre, DAC, or copper cabling experience
- Hot and cold aisle and airflow awareness
- DCIM tool exposure
- Prior experience working in GCC or Qatar data centers

WHAT WE OFFER

- Competitive salary depending on experience
- Travel and transportation expenses fully covered
- OEM Trainings
- Exposure to enterprise-scale infrastructure deployments across Qatar and the wider GCC region
- A collaborative, technically driven team with deep infrastructure expertise
- Clear path to grow into senior infrastructure or deployment engineering roles

To apply, send your CV to operations@g3hive.com with the subject line: **"DC Technician – Doha"**
