Robo-Geek

Dear Omar Silva-Fulchi and Abraham Kinzer :

My co-op placement comes to an end on April 21, 2021. I would like to thank you for the opportunity to expand my skills and knowledge at Robo-Geek. I feel like this opportunity has been beneficial and I have learned a lot about how programming has affected the world. I have gained skills such as using Python Idle, Google Collab and dealing with problems using problem solving skills, also I was not aware of CNN, RNN and TensorFlow before this placement. I had little to no experience with Python language as well; this placement has taught me alot and I am more confident in my post secondary pathway.

I aspire to follow this line of work in the future, I'm grateful for everything that you have taught me and Azaan. I'm very interested in the study of computers and machine learning and will look into future post secondary options. I enjoyed working with you very much over our time at placement, it was very pleasant to see how you work with younger students and can create a positive space for learning. Everyone always seemed to be very happy while working online and I was happy as well. I hope this opportunity will help me find full-time employment in the future as I will continue to build on my strengths and weaknesses to become the best person I can at work, using skills I have learned on the way there. This was truly a great starting point in my career and I hope I can make them count as I grow older, I thank you sir for all that you have done for me.

Yours Truly,

Varun Joshi
