

ABOUT US

Who are PDQ Global ?

- ◆ ***World Trade and Market Intelligence***
- ◆ ***Global Project Management and Shipping***
- ◆ ***Manufacturing and Sourcing Management***
- ◆ ***International Sales and Marketing Consultancy***
- ◆ ***Product and Project Introductions Management***

PDQ Global offer a worldwide network of business contacts and their associates that focus on introducing inventors, manufactures and trading companies to clients including major retailers, distributors and e-commerce platforms, requiring top quality goods, at competitive prices and shipped and delivered on time. Our strong links to innovative and world changing inventions, sets **PDQ Global** apart from the rest.

Incorporated in 2012 by Peter Hurst, who, having spent many years living and working in Hong Kong and Asia, brings a wealth of business experience and trusted colleagues and contacts. Alongside long term partners and fellow directors Hernan Grams and Luis Flotte, the PDQ team offers a complete sourcing, manufacturing, quality control and shipping service from Asia, from our offices situated in Central, Hong Kong & Kwun Tong, Kowloon. Our sales reach operated & run from Hong Kong, Barcelona, and Mexico City, covers Africa, the Americas, Asia, Australasia, Europe, the Middle East, Scandinavia and the United Kingdom.

The **PDQ Global** network covers a wide range of varied products and services, including medical supplies and services, modular building systems, 'green' solutions, including energy production and the use and introduction of technologies including 'NFC', (Natural Fibre Composite) a new process creating 'wood' by use of waste rice husks, saving vast amounts of tree felling, and an additive 'ECO', added to any polymer based material, enhancing biodegradability in anaerobic conditions, speeding up the process from 100's if not 1,000's of years to just a few, whilst also creating a faster rate of methane release, which can then be captured and used as a free, clean energy supply.

Other products include an 'all-in-one' lighting system, a modular scaffolding system rivalling traditional offerings, protective armour and corrosive and explosion coatings, a revolutionary flat-pack furniture system, requiring no tools for the extremely fast assembly and disassembly times the system allows, an AI device for detecting swimming pool drownings, and many other exciting opportunities, including our patented system of creating drinking water from air.

OUR MISSION STATEMENT

As a business of considerable international experience, **PDQ Global** is tasked with providing a very professional framework and quality operating tools, enabling businesses to operate and grow by offering access to valuable suppliers and R&D facilities, and with the expertise required to engage in the many import and export markets and the world.

PDQ Global offer a route to international businesses seeking trading relationships, providing direct contact with their proven partners, managing the complete supply process from conception to delivery.

Project Planning

Export Management

◆ **World Trade and Market Intelligence**

With over 30 years experience operating in world markets, working with its business partners, world business contacts **PDQ Global** are experts in understanding and interpreting world trends and applying market intelligence in a practical way for their clients.

At the planning stage of any project or business it is vital that management have a full and comprehensive understanding of customers and market trends, and are able to use their intelligence to best advantage over competition and market forces.

PDQ Global consults with some of the most brilliant business operators through their world contact network to provide their clients with first class intelligence and understanding of world trade with the intention of planning and steering a successful project or business outcome.

◆ **Global Project Management and Shipping**

Global Project Management involves the structures, systems, and considerations required to manage manufacturing and supplier resources across multiple countries, and an area of expertise **PDQ Global** have operated and been experts in for many years. Such needs may arise due to identifying suitable manufacturers or outsourcing of products, or as a natural part of a company providing services to both existing and new markets.

Establishing clear project budgets and developing comprehensive financial plans, are crucial in today's competitive marketplaces and **PDQ Global** constantly monitor budgets and expenses, ensuring adherence to financial plans and meeting customers target prices where possible.

PDQ Global with its experienced team, plays a crucial role in overseeing a project, from the early concept stage, design drawings and renders, tooling, pre-production runs and samples for the customers approval, manufacturing, final inspection and arranging the correct documentation and arranging shipping, ensuring any project is delivered, on budget, on time and on quality.

PDQ Global work closely with shipping forwarders both at the source and receivers destination port, allowing a customer complete assurance and peace of mind their consignments will be loaded on time, with full up to date information of the progress and time of departure and arrival, allowing them to keep their final customer fully aware of the arrival date into their warehouse or hub.

PDQ Global are experts in the area of Global Project Management and Shipping, with over 40 years experience in this area.

◆ **Manufacturing and Sourcing Management**

PDQ Global operate with an extensive array of trusted manufacturers and trading companies, dedicated to supplying top quality products within whichever market sector they operate in, all carrying the accreditations required today, and ensuring all regulations are strictly adhered to with regards to both the product itself and the workforce that produce it.

Prior to engaging with any new supplier, **PDQ Global** and its local market 'on-the-ground' team, conduct a full factory audit and due diligence, ensuring our partnerships are only entered into once we are completely satisfied with the new factory or trading company.

With our existing supplier relationships, we are constantly monitoring their facilities to ensure the standards that led to **PDQ Global** engaging with them initially, are fully upheld on an ongoing basis.

◆ **International Sales and Marketing Consultancy**

Founded in 2012, and operating from offices in London, Hong Kong, Mexico, and Spain. **PDQ Global**, alongside their manufacturing and trading partners and business operators worldwide, provide expertise in Sales & Marketing and Consultancy.

Working with multiple manufacturers, and producers around the world to develop their NPDs and existing product and find new customers that can help their business develop, or trade globally with more efficiency.

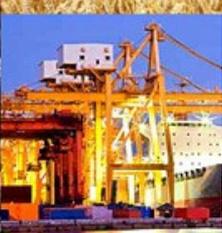

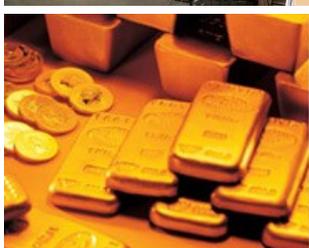

As an International Sales and Marketing Consultancy working with a world network of business professionals, **PDQ Global** offers their clients unrivalled expertise in reaching and engaging with world markets.

◆ **Product and Project Introductions Management**

PDQ Global offer a service for customers from around the world, that introduces them to a diverse portfolio of manufacturers and sourcing companies in many product sectors, and globally sourced commodities and allowing them to achieve their growth aspirations and long-term business goals.

We minimise risks through diversification of manufacturing and supply partners, providing services from concept, design, pre-production samples, manufacturing, inspection, paperwork and shipping, with our clients safe in the knowledge that a professional team are managing their requirements and trading.

Contact PDQ Global to discuss your project or business idea.

Clients Represented by PDQ Global Ltd

Modular and Flat Pack Building Solutions.

Overview

Working with our modular structures partners, PDQ has represented their modular construction systems for social housing, private developments, commercial buildings, workers accommodation, and hospitals since 2013.

PDQ Global specialises in identifying prospects through market research and business network contacts, negotiating for their clients with governments, developers, companies and individuals around the world.

Fast Assembly & Disassembly Flat Pack Furniture "Made in Minutes"

Overview

Since its invention in 2021, PDQ has represented the manufacturing and distribution of an innovative new flat pack furniture range, identifying and qualifying prospects, negotiating with manufacturers, suppliers, distributors and retail partners around the world to bring this amazing new system to market in a vibrant and fast expanding business sector.

A sustainable agricultural husk based 'wood' substitute. Termite Proof / Waterproof / Flame Retardant Thermoformable / Easily Machinable & ECO-Friendly & Recyclable

Overview

For several years PDQ Global has represented the distribution of a Natural Fibre Composite product, a sustainable substitute for wood, manufactured from waste rice husks, and helping save thousands of trees a year from being felled. It is a superior alternative to tropical woods and wood based panels such as MDF and Plywood. It offers multi uses including furniture, facades, terrace, fencing, benches, garden & pool side furniture, kitchen & bathroom furniture. Partitions & wall panelling. The product can be thermoformed.

Lighting The Future.

Overview

PDQ Global has represented a patented lighting system since early 2019 presenting to both developers and builders. Conventional lighting fire safety and energy-saving systems are untidy and clutter the ceiling but now, you can combine them all!

Invented and designed to minimise ceiling installations, and maximise interior style. Our downlights are made to be 100% compatible with our Emergency light, Sprinkler, Smoke alarm, Heat alarm, CO alarm, PIR sensor – one light fits all.

Engineered, tested & developed for seamless integration, ease of installation and flawless protection. Time-saving and cost saving features like our unique, removable bulbs and quick connect junction boxes make our product the best residential fire-rated downlight on the market

PLATFORM TRESTLE TOWER

The Scaffolding Alternative Solution

PLATFORM | TRESTLE TOWER

Overview

PDQ Global represents and assists in the sales and marketing of platform systems in the UK and Europe. Manufactured on site and supplied to companies around the world, involved in the building and construction industry.

We are 100% focused on providing systems that offer cost and time savings and safety advantages and are the UK's number one choice for load bearing systems.

Whether a scaffolding company, developer or contractor, we have a system to assist and keep the workforce safe.

World Trade and Market Intelligence
Global Finance and Project Management
Private Investment and Wealth Management
International Sales and Marketing Consultancy
Agricultural Project Management - Import/Export Finance

Overview

PDQ Global works closely in Africa via our partners who have a worldwide network of business contacts and their associates, connecting many businesses with African buyers, and trade within the African continent.

We offer and provide a wide range of services to support and grow African business, and access to a vast pool of expertise from our consultants around the World.

Through our representation services, we are able to provide professional sales and marketing expertise for African businesses, and seek new markets & customers, promoting world trade.

Award-winning, computer vision and machine learning technology for monitoring pool activity. Developed the first and ONLY Virtual Lifeguard.

Overview

PDQ Global represents & assists in the sales, marketing and distribution worldwide of a revolutionary drowning solution, for use with both home and commercial pools. Our system, is the worlds first & only computer vision and AI based in-pool virtual lifeguard, using our patented detection system, and suitable to work during normal use of the pool. Visual and sounds alerts are shown on an installed house unit and on a smartphone. The system can include pool management, wellness & lifestyle features in the same device.

- * 370,000 Annual Drowning deaths worldwide <https://www.stopdrowningnow.org/drowning-statistics/>
- * Drowning is the leading cause of injury-related death in children aged 1-4, before motor vehicle crashes **CDC Childhood Injury Report**
- * 88% drowning deaths of children under 14 occur with at least one adult nearby <https://www.stopdrowningnow.org/drowning-statistics/>

PERFECT DESIGN

- Easy to install
- NVIDIA Processor
- Real Time Advanced AI
- Underwater High Resolution Camera
- Above Water High Resolution Camera
- In-Home Alarm
- Mobile Notification
- Wi-Fi Connection
- In-Water Movement Sensors
- Waterproof Enclosure
- Drowning Detection
- Risk Calculation
- Escalating Alarm System
- Complete Monitoring View
- Real-Time Analysis

EVEN WHEN YOU ARE MOMENTARILY DISTRACTED, MYLO

OUR PRODUCT POWERED BY AI, COMPUTER VISION & IOT

WIFI and Bluetooth Connections available for IOT Features

Above Water Camera

CPU&GPU Inside All algorithm is running in the box and not in the cloud To guarantee fast Action

Pressure Sensors
Temperature Sensors

Home Unit - receives notifications and reports on battery and connection status

Bellow Water Camera

LIFE SAVING AI TECHNOLOGY

1 Entrance Detection and Notification

Based mainly on strong video analytics, as opposed to pool alarms that alert on any water movement, reducing dramatically false alarms

2 Pre-Drowning & Drowning Detection and Alert

Detects and alerts 24/7 upon any drowning scenario, the most important feature in the system - no other product for residential pools provides such capabilities

REGULAR POOL ACTIVITY

DROWNING

ALARM

BIOGAS - MINI

Making Waste Matter

100+ Countries

20,000+ Systems Sold

Overview

PDQ Global assists in the sales of Biogas Mini, a world leader in the development of an easy to use, ground breaking biogas system, enabling people and businesses turn their organic waste into clean energy.

By turning organic waste into cooking gas and Bio fertiliser, our systems offer a comprehensive solution for organic waste management, renewable energy creation, sanitation & sustainable agriculture practices.

The World Health Organization estimates 2.3 billion people without access to basic toilet facilities. The Bio Toilet off grid solution connects to the Biogas system to convert human waste from toilets directly into clean energy.

PRODUCT PORTFOLIO

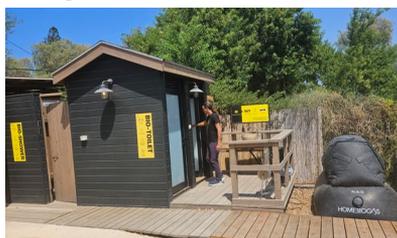

Biogas Mini 2, 4 and 6 are compact bio-digesters that convert kitchen waste into cooking gas & Bio-fertilizer on-site.

The Farmers System, is an affordable and innovative solution that converts livestock manure into clean cooking gas and liquid Bio-fertilizer.

The Bio-toilet Kit System, is a sustainable and sanitary solution, transforms human waste into free cooking gas and effluent.

Making waste-to-resource solutions accessible to all through the technology of nature

BIO-POWER

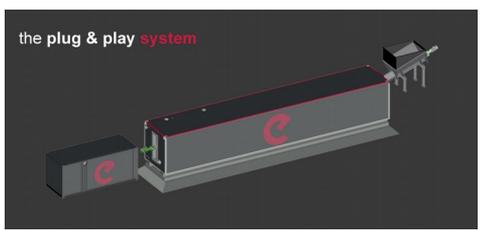

GLOBAL SUPPLIERS OF BIOGAS PLANTS & MODULAR SOLUTIONS

Overview

PDQ Global, introduces Biopower, as a company that offers solutions, by way of their waste management business and constructing large, tailor-made industrial plants, already on 3 continents, using high technology, high quality, modern and architecturally ambitious designs and are a sought after and competent partner in the biogas market.

It is the team that makes them a unique company, with full in-house engineering, food, environmental, process, plant & construction teams, having biological, chemical, machinery and civil expertise.

We also offer a compact 'plug & play' system, which is a fully containerised biogas plant, and is manufactured using today's most available and advanced technology. A perfect compact design and solution where only small amounts of organic waste streams are available. The systems require a minimal space compared to the output of gas production. The biogas generated in the digester, can be converted into electricity or heat or be simply used as crude biogas for a boiler system and the digestate used as a fertilizer.

- (organic) waste industry
- municipalities and waste management companies
- food processors
- livestock and poultry growers
- slaughterhouse operators
- Distilleries
- vegetable and fruit processors

SOLAR SMART

Solar, battery storage and inverters specialists, that provides high quality green technology for both our customers and the environment. Achieved by using innovative design, high standards in production and great value for money in the world of renewable energy.

Smart Energy Solutions for all your needs.

The Swiss Army Knife of Solar Inverters

Overview

PDQ Global work alongside our partners at Solar S, an innovative company in the area of renewables and revolutionising the way we generate, use and store energy.

In a world where energy costs are soaring, and many governments are turning towards renewable's as the ultimate solution, Solar S stands at the forefront of this transformative journey. Customers can be fully confident that the Solar S range of solar storage solutions cater to their specific needs, whether a large scale installation is required or an individual homeowner.

Solar S also offer portable solar charging solutions, perfect for camping and travelling.

EV Charging Solutions.

Overview

PDQ Global alongside our EV innovation partners, work closely with Solar S, to provide Micro and Hybrid inverters, Energy storage and EV Chargers. Focusing on the EV offering the PDQ industry leading chargers are sleek, smart, fast charge and go above and beyond when it comes to safety and security.

There are many electric vehicle (EV) charging incentives being offered to homeowners and businesses, as governments, cities and regions see the installation of residential and commercial charging stations as key to accelerating the adoption of electric vehicles to assist with reducing GHG emissions and tackling the ongoing issue of climate change.

Domestic Use

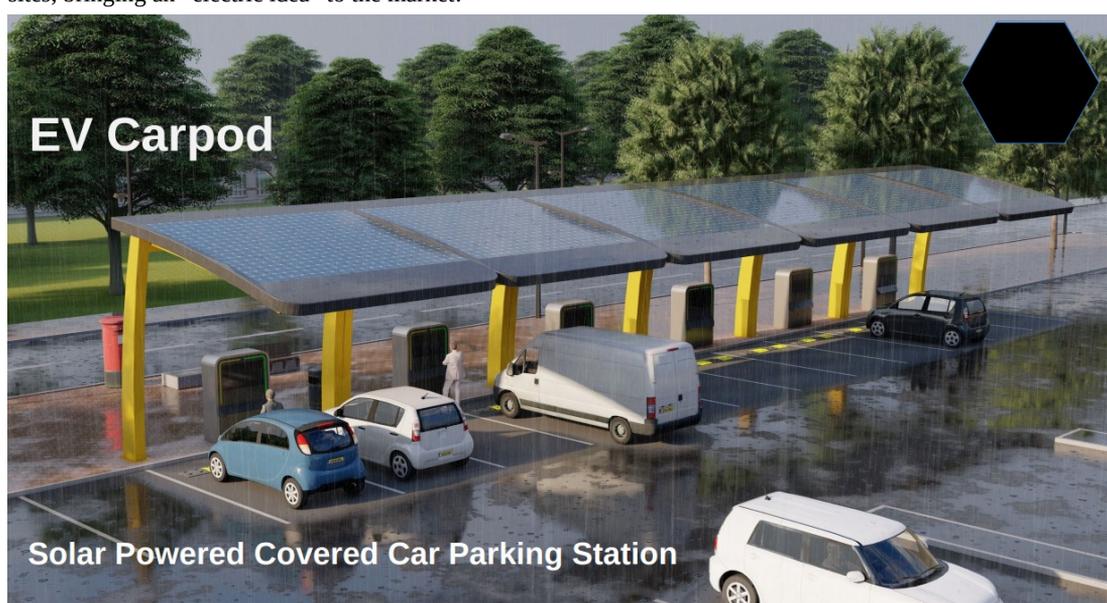

PDQ Global, working with our two key partners in renewable energy solutions, Solar S and EV Charging Solutions (EVS), have provided a joint venture solution with our modular buildings company, to provide solar powered covered car parking charging stations.

These offer a perfect solution to multi charging requirements for NGOs with large numbers of on-site employees, or shoppers visiting their local supermarket, hospital car parks, overnight charging for fleets of new, eco- friendly delivery vehicles, and in many other daily situations, including home use. In many cases, this solution can be erected over existing car park sites, with sizes of the overall structure based on required charging units and usage. Cost effective and bringing shaded areas in very hot climates and protection in inclement weather conditions.

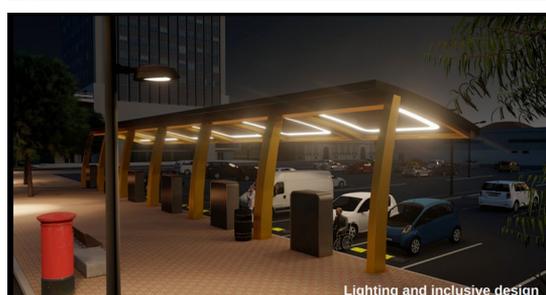

The latest materials are used to construct the main steel framed structure, with a series of shallow angled roofs, where multi solar panels are placed allowing the most efficient capturing of the sun's rays to charge and recharge the system. Each car parking bay has its own individual supply stanchion, fitted with double EV charging points.

The Solar Powered Covered Car Parking Charging Station, is one of the most effective medium to larger scale solutions offered in solving the issues related to EV charging, constructing new or utilising already existing sites, bringing an "electric idea" to the market!

Protection from hot weather

Innovation In Wind

Turning traditional turbine architecture on its head

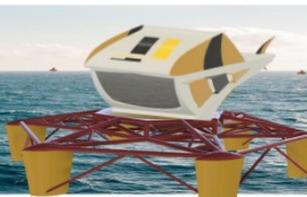

Overview

PDQ Global are introducing a new and patented wind energy technology, which increases the power output range from a few KWs to 20 MW+ on our utility scale machines by X 10 compared to traditional turbines, leading to ground breaking on-shore and off-shore opportunities.

We are also developing a multi-rotor vertical axis turbine, with blades arranged similarly as on helicopters. A Duct Fairing system, directs the wind vertically upwards to the rotors, accelerating the wind velocity more than x 2, leading to a wind power increase of more than x 10 per M² of the rotor swept area.

- 35% more energy harvested per
- 5 x Fewer Installations
- Improved wind shift response
- Integrated electrical sub-station

- Floating Platform**
- Fast build modular construction
 - High stability large buoyancy footprint
 - Deep or shallow seas

Floating Demonstration
Poole Harbour, UK 2022

5KW Demo Turbine

- * Significant architectural advantages
- * 50 MW + horizon architecture with only 50M blades
- * 40% LOCE reduction for floating offshore wind vs bottom fixed turbines
- * Independent verification by Cranfield University
- * Direct benefits to the following markets:
 - Electricity – Heat – Green Hydrogen - CO2 Direct Air Capture (DAC)

Enhanced Biodegradation Solutions for Polymers.

Overview

PDQ Global represent Eco. Their additives, when added to the base polymers of most plastics in use today, and are made of organic materials, attract microbes in anaerobic landfills, and view Eco as a food source, consuming the plastics over a much shorter period of time than untreated traditional plastics.

The additive reduces the plastic to the same end of life as nature would, leaving behind just biomass (humus), CO₂ and Methane, which can be captured and used as a free, clean energy source, a system already used by over 50% of landfills in the US.

Plastics can last for hundreds of years, even in modern landfills. Eco additives enhance the biodegradation process with results shown to be from several months for thin films, to a few years for larger items of plastic, even clothing. Eco additives are also proven to speed the process in ocean and even soil environments.

Laboratory tested to ASTM; D5511 independent testing.

OUR VISION IS FOR EVERY BEACH, EVERY PARK, EVERY FIELD TO BE LITTER FREE, FOR FUTURE GENERATIONS TO ENJOY.

CREATING DRINKING WATER FROM AIR

Overview

PDQ Global have partnered with a patented technology that creates high quality drinking water out of air for people everywhere.

The production of drinking water from humidity in the air (AWG) is one of the most important and innovative water extraction solutions available today, used to tackle the growing problem of depleting levels of drinking water in the world. Within a decade from now, it is believed that 50% of the world's population will live in areas without access to clean, fresh, safe drinking water.

Air is a cleaner platform than soil, and water production from the air eliminates the need for groundwater pumping and the fear of soil contamination. The quality and taste of the water that is processed using air-to-water technology is of the highest standard. Air-to-water production bring a new source of drinking water to our world, reducing the dependence on municipal water and with old, expensive infrastructure and pipes. This results in premium, delicious tasting drinking water directly at the place of consumption. Drinking water from air is untouched by human hands. It eliminates the need of carbon-intensive supply chains and environmentally harmful plastic bottled water.

Commercial
GEN-L
Up to 6,000 Liters a day

Commercial
GEN-M PRO
Up to 900 Liters a day

As populations around the world increasingly struggle to access clean, natural water, we have developed with a game-changing solution that uses humidity in the air to create clean and fresh drinking water.

Our innovative technology taps into the atmosphere – an unlimited, freely available resource – to provide drinking water to people everywhere, from the most remote rural village communities to commercial office buildings to private homes.

In a few short years, we have become a global leader in the development and implementation of water-from-air solutions based on our proprietary cutting-edge, patented technology.

Our water generators are in a range of sizes to suit cities, villages, commercial centers, schools, hospitals, offices, residential buildings, private homes and more. They all produce the safest, cleanest and freshest-tasting drinking water, improving the quality of life, and even saving the lives, of potentially billions of people around the world.

PDQ Global and partners, aim to provide access for every man, woman and child around the world to fresh, clean and safe drinking water.

Using state-of-the-art technology, we will provide people with a renewable source of high-quality drinking water, extracted from the air, making it available anywhere, on demand and at a reasonable cost.

Our revolutionary system brings the following advantages:

Premium drinking water quality:

Food Grade heat exchange, air filtration, water purification and mineralization in all our products

Unique and innovative technology

Our revolutionary patented system extracts water out of the humidity in the air, an unlimited source of water

Environmentally friendly independent water solution

Our products are easy to install, completely independent of any water piping. By using our products reduces the need for plastic water bottles and 5-gallon solutions

A multi-disciplinary team

Our team of chemists, biologists, physicists and engineers have combined their broad ranging expertise, to power our unique technology and make premium drinking water accessible to the world

The highest standards of quality

Our in-house lab is equipped with the latest technology and cutting-edge equipment

Energy efficient & Cost effective

Our products produce 1 liter of water using as little as 0.3 KWH, in a variety of climate conditions. Operating temperature of 15-40°C and $\geq 25\%RH$

Complies with international water purification standards

We are the first AWG manufacturer to comply with American standards ASSE LEC 2004. All of our products comply with EPA, NSF61 and the Federal Drinking Water Standards

Customer support

Close after-sale support to ensure customer satisfaction

A self-service smart wheelchair solution

Overview

PDQ Global are helping to roll out the concept of on demand wheelchairs for patients and passengers when they need them most.

We are at the forefront of healthcare and aviation mobility, innovating through our state-of-the-art automated self-service wheelchair rental stations.

Since 2017, our mission has been to provide supply and availability of wheelchairs to those in need, and enhance the experiences of both patients and passengers and is the cornerstone of our vision.

We handle the operational responsibility and full management of stations and wheelchairs, allowing hospital and airport staff to focus on providing the care required for patients and passengers, while we expertly manage inventory, track usage, and ensure meticulous maintenance of our wheelchairs.

Providing medical storage solutions for today's leading Healthcare Organisations on a Worldwide basis. We help the people who are helping others.

Overview

PDQ Global alongside Storage Medical Concepts, are supporting Healthcare Globally, via their comprehensive product line and international network.

Offering a wide product range of top quality medical storage solutions, cabinets, transportation, emergency, & procedure carts.

PDQ collaborates with healthcare distributors globally and partners with local vendors for customised solutions. We are focused on working with knowledgeable local distributors, who have a strong understanding of medical furniture and storage solutions markets.

We are 100% focused on providing the best service to hospitals and clinics and offer tailored solutions through partnerships and localised adaptations.

Blast, Ballistic & Corrosion Mitigation Coatings

Overview

PDQ Global working with our partners, whose liquid patented coating is the world's most innovative and is a breakthrough technology that offers superior size and weight savings at costs comparable to traditional, heavy steel and ceramic armour solutions.

It was developed using advanced Nano technology for next generation protective polymer coatings. This transformational next-generation product allows us to offer customised solutions that meet or exceed your requirement. We are constantly researching and developing products to ensure the highest standards are met with ever changing demands.

Our protective coatings have been used to safeguard man-made structures from kinetic, blast and outer fragmentation effects. Our specialised, and high performance sprayed-on elastomeric coatings are engineered for maximum durability and limitless application potential.

We operate around the globe and all our products are engineered to last, and ensure that your assets and equipment are protected from everyday hazards, as well as the most demanding battlefield environments.

Applications are developed to meet client-specific needs as a supplementary armour system and as part of the primary vehicle armour structure, and is also well suited for coatings, linings, joint fillers and repair materials for a wide variety of industrial, commercial & maintenance environments.

What makes this liquid extraordinary?

- * SELF HEALING PROPERTIES
- * PLURAL COMPONENT
- * LIGHTWEIGHT MITIGATION SOLUTION
- * INERT AS A SOLID
- * EASE OF INSTALLATION TO COMPLEX ANGLES
- * EASILY INCORPORATED WITH OTHER MATERIALS
- * COMPETITIVE COST SOLUTION
- * SUPERIOR BONDING CHARACTERISTICS
- * EXCELLENT ADHESION
- * PREVENTION OF CATHODIC DISBANDMENT ON STEEL/ALLOY SUBSTRATES
- * HIGH PERFORMANCE

THE ULTIMATE BALLISTIC PROTECTION

Overview

PDQ partner with the leading manufacturer of ballistic, personal protective and tactical products in the world, having state-of-the-art manufacturing facilities in Europe, the Middle East and Asia, with our design and development team based in the UK.

We offer the latest generation of vehicle, personal and point protection solutions including overt and covert body armour, ballistic helmets, hard armour inserts, bomb disposal suits and suppression blankets, building and vehicle armour. As one of the most vertically integrated manufacturers in the world, we ensure quality and control at every step in the highly specialised manufacturing process.

Our vision is to bring unprecedented leading-edge nanotechnology protection for & to provide our users with as near perfect protection as leading edge science will allow at the lowest weight, & the lowest possible cost. Offering innovative, cost-saving and lightweight solutions, all our products are engineered to last, and ensuring your equipment or assets are protected from everyday hazards as well as the most demanding of battlefield environments.

SPACE CAPSULES - HOTELS & HOSPITALITY CENTRES PRE BUILT STYLISH SMART SOLUTIONS

Overview

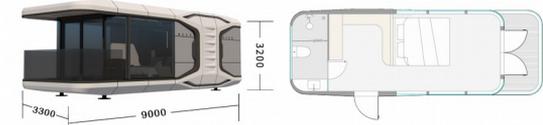

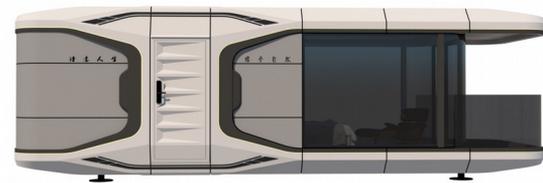

PDQ Pods are available in a range of contemporary designs and sizes and are a perfect solution for hotel construction for the tourism industry and pop up usage for sporting events and music festivals.

Our China factory partner, was the first company to introduce the concept of Space Capsule Modules & leads the trend of mobile micro-buildings, which integrate cultural and tourism development.

We are focused on bringing ecology, science and technology as we strive to provide customers with better products and services, to become the leader in high-end holiday travel and accommodation in the next few years. Our space capsules are equipped with every modern feature required by a discerning guest to ensure a comfortable and memorable stay.

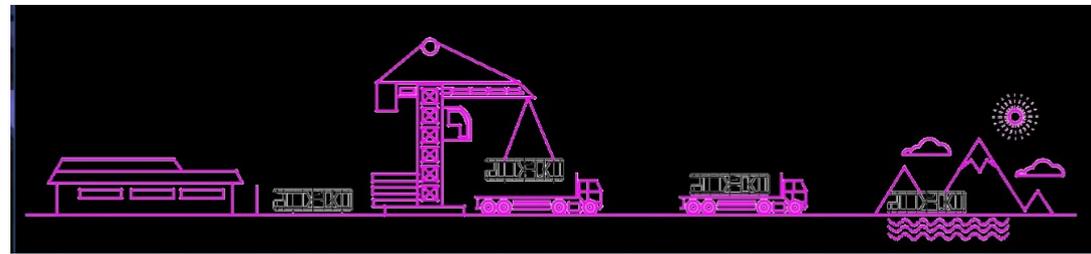

Al-fresco patio areas for that early breakfast or a pre concert cocktail, relaxing lounges, state-of-the art bathrooms and even washing machines and cooking hobs can be supplied and fitted.

Our pods are safe and secure. We only use the finest insulated materials for the main body construction and double glazed windows and external security doors. High quality wooden flooring, LED lighting and air conditioning are all fitted as standard.

Electricity and water are available via connection to the local site utilities and solar power systems are also an option if required. Widescreen TVs can be fitted and stereo-systems, and all electrical appliances supplied and fitted are of the highest quality and fully warranted and covered by the manufacturers guarantees.

Showers, washbasins and toilets are of exceptional styling and are available in a range of colours if required. We hope that you enjoy the unique experience of your stay in a **PDQ SPACE CAPSULE POD**

Overview

PDQ understands the increasing problem of e-bike battery explosions and fires does not occur with the higher quality E-bikes and their batteries due to the standard manufactured and installed, however this problem, often occurs on cheaper models of bikes and increased by customers buying replacement batteries via online sites, and from Chinese manufacturers etc.

We have all watched in horror at the many stories of serious injuries and fatalities caused by such incidents, which are only increasing as E-bike sales continue to gain worldwide expansion.

Who therefore is responsible for E-bike battery safety? Manufacturers, traders or consumers? The answer has to be, all three.

Model: EBC-2 – E Bike Battery Cover

Standard Features:

- YKK Heavy Duty Zips
- Liquid Armour Coating
- Heavy Duty Nylon Material
- Inner Zip Covering 'fly' for Extra Protection

- Custom Colours Available
- 2-Way Charging Connector
- Extra Strong Carry Handles
- All Seams Double for Reinforced Protection
- Sizes Available: From: 32.5 x 9.2 x 9.0cms - To: 37.2 x 12.2 x 8.0cms

Our aim at PDQ, is to develop, alongside the respected E-bike manufacturers and their battery supply partners, either an LA coating applied directly on to the batteries themselves or alternatively a protective battery bag using Kevlar and coated with our nano-protective blast mitigation solution, to contain explosions and therefore extend the time for possible victims to escape any potentially fatal fire.

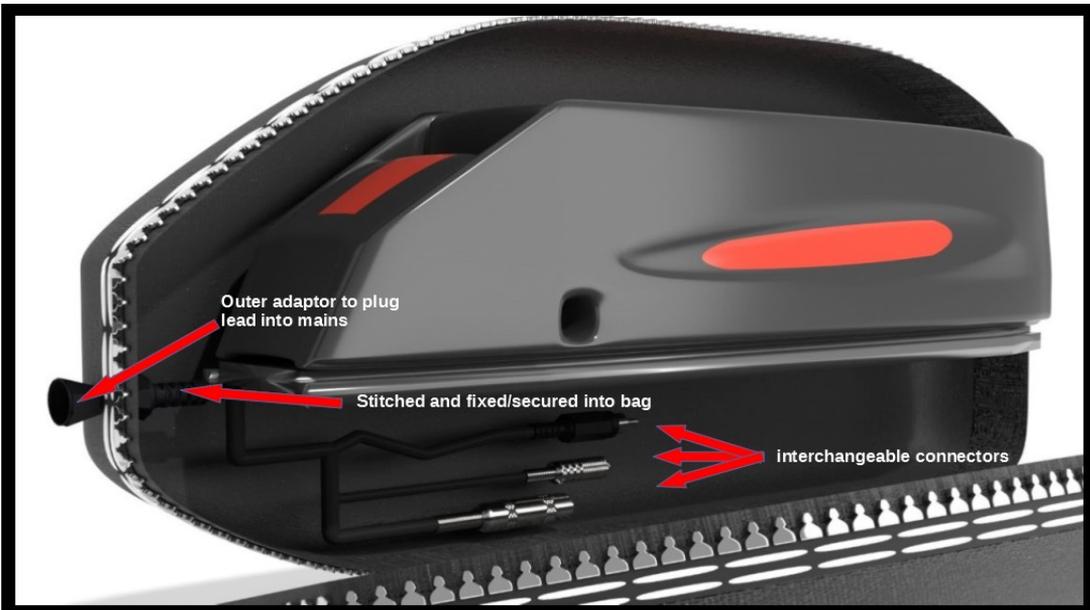

PDQ, collaborates closely with our partners, with their manufacturing facilities in the UK, USA, Turkey and India, and offices and facilities also in Dubai, who are specialists in ballistic, personal protective and tactical products and has become one of the world's most trusted and reliable suppliers for PPE, personal protective equipment. Our group is one of the world's most vertically integrated company's by having its own ability to weave Kevlar® TM (Duly Supported by DuPont) and an in-house manufacturing capability

to produce hard armour composite panels which are lighter and stronger than steel and using our technical expertise in designing and tailoring clothing for different military and security applications.

PDQ understands the increasing problem of e-bike battery explosions and fires does not occur with the higher quality E-bikes and their batteries due to the standard manufactured and installed, however this problem, often occurs on cheaper models of bikes and caused by customers buying replacement batteries via online sites, and from Chinese manufacturers etc.

With BLAST MITIGATION properties, our products offer superior energy absorption and fragment containment. Working with end-users and industry experts, our Liquid Armour coating uses a super nano advanced blast mitigating polymer. This patented and proprietary polymer, provides military assets and structures with a flexible and dependable debris penetration solution that can be applied to almost any existing surface, and forms a seamless, super-resistant barrier, ensuring that assets and structures are able to absorb the blast energy. The absorption and elongation of our coating extend the blast duration, significantly reducing the peak shock wave.

PDQ and its partners technology will be used to develop a product that helps protect lives and properties, by reducing the risks of E-bike battery explosions and fires.

**The Experts you can trust in intermediation
between importers & exporters of merchandise
on a Worldwide scale**

Overview

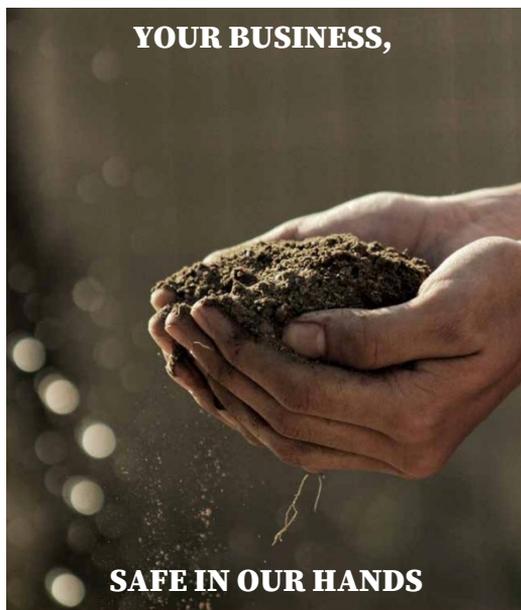

PDQ Global have partnered with one of the leading companies in the world, offering intermediary trading services,

We analyse many world markets and locate the products that the client requires based on their needs and demands, connecting companies within foreign trade circles, in order to broaden their range and areas of business.

PDQ Global are experts in the fields of foods, commodities trading and supply. Our services to customers include but are not limited to the following:

- * CUSTOMS MANAGEMENT
- * LOGISTICS MANAGEMENT
- * FINANCING AND INSURANCE
- * OWN DISTRIBUTION NETWORK
- * IDENTIFICATION OF SUPPLIERS
- * EXPORT AND IMPORT OPERATION
- * NEGOTIATION OF THE CONDITIONS
- * DISTRIBUTION & SALE OF THE PRODUCT

Our extensive range of products and expertise cover fish and seafood, meats; beef, lamb, pork and chicken. Fruits; tangerines, lemon, limes oranges, avocados, cherries, blueberries, pears, and bananas. Our commodities trading includes woods, sugar, legumes, corn, barley, alfalfa, soy, soghum and wheat. We also offer olives, powdered milk, oils and quality coffees from all around the world.

**Fresh products from the field, processed
and gourmet products from all over the world.**

Overview

PDQ Global are partnered with Taras Co. Made up of a dynamic team and multidisciplinary group of professionals specialising in the food sector. Our expertise is the sourcing of day fresh products from the field, and processed & gourmet products from all over the world.

Taras Co have import and export licenses for food from the Sanitary Register of products, allowing a fully proven and safe offering of a range of both European and Mexican products. With a diverse network of suppliers & distribution of the highest quality products available today, and thus able to provide the best delicacies that the world can offer.

Having offices and infrastructure in both Mexico & Europe, our vision is to be a trusted bridge that connects the markets of Europe, the Middle East and Latin America.

Our offerings include the finest quality avocados, Hass, from Mexico which are known for their very creamy texture and unique buttery flavour. They are incredibly popular due to their great taste and quality, rich in heart-healthy monounsaturated fats, vitamins C, E, and K, and dietary fiber, and are used in world famous guacamole, & are the perfect salad companion, in sandwiches, burgers and milk shakes, avocado earns its super fruit name!

Taras Co are distributors of Lakpura. This product is obtained by atomisation of premium milk, then correctly pasteurized, thereby obtaining a product with a pleasant flavour specifically fit for human consumption.

Another product offering from Taras is the famous Orangina drink, bringing you a unique taste of the Mediterranean through its authentic orange flavour with real fruit pulp and natural orange zest, this has brought Orangina's success all over the world.

A further speciality offering from Taras are our supply of blueberries. Of different origins, & with a deep blue colour, our berries are full of flavour. considered a Superfood, they can be the perfect healthy snack, part of your smoothie or desserts.

Taras also offer a limited range of fine both white and red wines from the vineyards of Argentina.
