

**PDQ GLOBAL HOTELS & HOSPITALITY CENTRES – PRE BUILT STYLISH SOLUTIONS**

**PDQ Global pods are available in a range of contemporary designs and sizes and are a perfect solution for hotel construction for the tourism industry and pop-up usage for sporting events and music festivals. Our China factory partner, is the first company to introduce the concept of Space Capsule Modules and leads the trend of mobile micro-buildings, integrating comprehensive cultural and tourism development. We are focused on bringing ecology, science and technology as we strive to provide customers with better products and services, to become the leader in high-end holiday travel experiences and accommodation in the next few years. Our space capsules are equipped with every modern feature required by a discerning guest to ensure a comfortable and memorable stay. Al-fresco patio areas for that early breakfast or a pre concert cocktail, relaxing lounges, state of the art bathrooms and even washing machines and cooking hobs can be supplied and fitted.**

# Model: Q30 – SPACE CAPSULE

Dimensions: Length: 6,600 \* Width: 3,300 \* Height: 3,150 Cms

Floor Area: 21.7m<sup>2</sup>

Gross Weight: 4.8 Tons

The Q30 is a minimalistic styled rectangular capsule, designed in a White & Grey colour scheme, with a sloping roof bringing an elegant exterior appearance.

# Model: Q30 – SPACE CAPSULE

The Q30 interiors are stylishly fitted with high quality laminate flooring and panelled ceiling. Floor to ceiling windows and a large skylight. Smart lighting and sound systems, intelligent toilets, air-conditioning and all the facilities required and expected from a top rated hotel but within the confines of a guest's own Space Capsule, ensuring either a weekend break or longer stay remains an unforgettable experience.

PDQ Global pods are protected by in excess of 30 invention, utility model & appearance Patents and are easy to ship and install on a customers final destination site. Shipping and local delivery to site can be arranged if required, even to what may appear to be the most.....

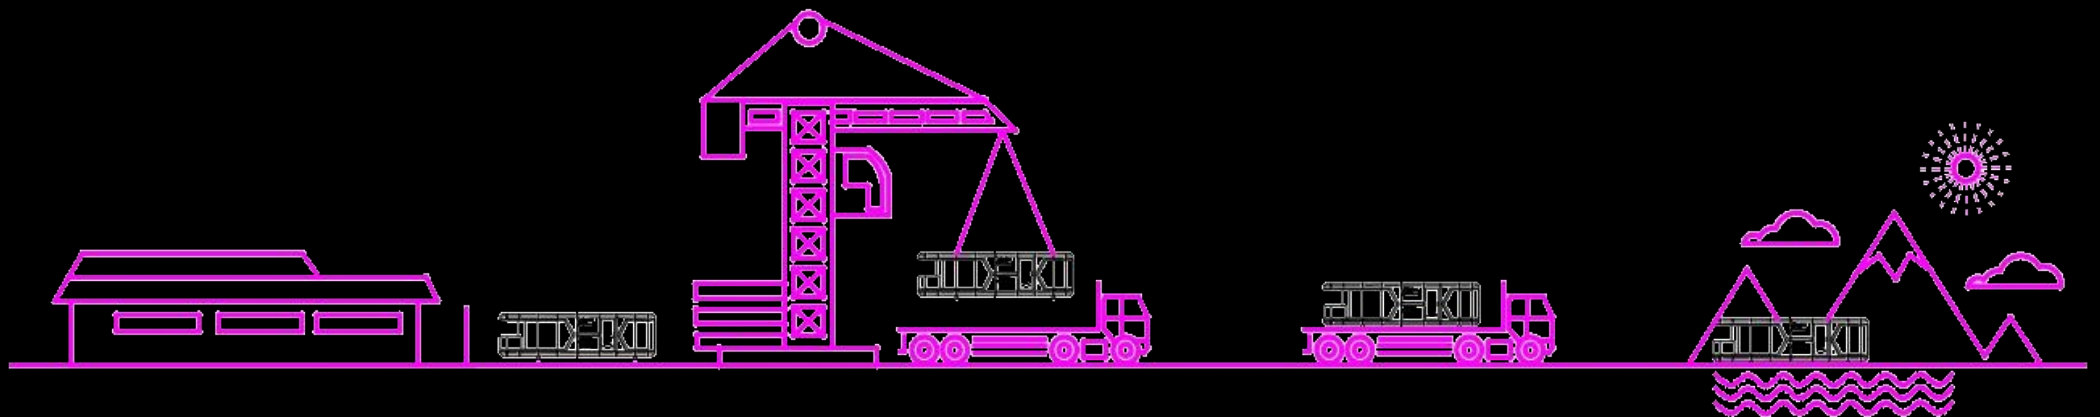

.....Challenging of locations!

# Transportation & Installation:

PDQ can, if required, arrange both the overseas shipping and transportation to the Capsules final destination site.

A standard delivery truck is a 13.5m in length semi-trailer, with a width of 3.0m. The overall height does not exceed 4.2m, therefore allowing the vehicles to travel without restriction on local roads. A crane is required at site, which must be arranged by the local on-site installation team and this is recommended to have a lifting capacity of 25 tons. The weight of the Capsules is between 6 & 10 tons depending on model.

Prior to placement, the load bearing foundations guidelines supplied in our standard foundation technical drawings must be followed and the on site required utilities, water, electricity & sewage installation must be completed and the Capsule precisely positioned for connection of both the water & electricity. Utilities testing must be completed prior to sign off and customer satisfaction.
