Sub: Gas Fuse -

Dear Sirs,

Please refer to your letters dated 5-10-95 and 9-10-95
on the above subject.

It is accepted that the equipment Gas Fuse proposed to
be marketed by you for fitting in domestic LPG cylinders
between the valve and the regulator serves the following
three purposes -

1. It shuts off gas supply from the cylinder in case of
major leaks due to rupturing of the tube or otherwise.
2. Minor leakage in the system after the Gas Fuse, can be
tested through indication in the pressure gauge.
3. Indication in the pressure gauge can roughly show the
quantity of gas left in the cylinder.

It is noted that the equipment Gas Fuse described as
Excess Flow Check Valve model EOL-S is covered under a test
certificate from Underwriters Laboratories Inc. So far as
this Department is concerned, there will be no objection to
the use of the equipment provided the same is manufactured
as per the prescribed specifications under recognised third
party inspection. Further particulars in this respect may
be submitted to this office for approval.

Yours faithfully,

A.S. Ghoshal
