 www.kuzh.in

Enthusiastic and detail-oriented 3rd-year Industrial Design student specializing in the design of lighting and peripheral devices. My work focuses on creating products that seamlessly integrate form and function, offering both aesthetic appeal and practical usability. I am adept at user research, iterative design and eager to contribute my skills to a challenging and rewarding design role. My design process is driven by a deep understanding of user needs and a commitment to iterative design. I am adept at conducting user research to identify pain points and opportunities for improvement, translating these insights into compelling design concepts.
