

DATASHEET

ALCOHOL

Effective Protection with 70% Alcohol
for Clean and Healthy Hands and Skin

CHEMICAL COMPOSITION

60% Ethyl Alcohol, 10% Isopropyl Alcohol, Moisturizing and softening agents and excipients

PRODUCT SPECIFICATIONS

DERM is a hand and skin antiseptic that contains alcohol, is applied to the hands and skin, and has a quick response time. With its alcohol-based structure, it offers the most effective and fastest antiseptics against contaminating bacteria and other microorganisms on the hands. It softens and protects the skin. It's dermatologically tested.

AREAS OF USE

DERM is used any place where health care is provided for the hygienic and surgical hand and skin antiseptics such as clinics, operating rooms, intensive care units, laboratories, dentist examination rooms, patient care at home. It is used as an aid in prophylaxis against infection in all fields of food production and processing industry and physicians clinics.

ANTI-MICROBIAL CHARACTERISTICS

Bactericide (including methicillin and vancomycin resistant),
Fungicide, Virucide, Antimycobacterial, Tuberculocide
