

DATASHEET

CHLORINE TABLETS

Convenient, Effervescent Tablets for Instant Solutions

CHEMICAL COMPOSITION

Troclosene sodium, dihydrate %50-100

PRODUCT SPECIFICATIONS

Chlortab is a water-soluble effervescent chlorinated disinfection tablet product designed for use in various places such as health centers, laboratories, hospitals, etc. where hygiene is required and there is a risk of infection. It is used to maintain the hygiene of floors and surfaces made of many materials such as stainless steel, porcelain, plastic, glass. This product consists of concentrated water-soluble tablets that interact with water to release free chlorine. It has high material compatibility and offers the possibility to prepare solutions with different ppm values. Chlortab comes in an easy-to-store and transportable form.

AREAS OF USE

For disinfection of blood spills, general clinical environment, sinks and drains, babies' bottles, and catering equipment

USE

To achieve a solution of 1.000 ppm, dissolve 1 x 3,4gr. tablet in 1 litre of water; or for a solution of 10.000 ppm, 10 x 3,4 gr. tablets in 1 litre of water. * Water Temperature : 15-35 C
