

DATASHEET

DERMAX

Powerfull Antiseptic for Effective Use on
Hands and Skin

CHEMICAL COMPOSITION

70% ALCOHOL AND 0.5% CHLORHEXIDINE

PRODUCT SPECIFICATIONS

It is a hand and skin antiseptic which contains alcohol, is applied on hands and skin and has a short-time action. It provides the most effective and quick antisepsis of the contaminant bacteria and other microorganisms on hands with its alcohol based structure. It softens and protects the skin. It is dermatologically tested.

AREAS OF USE

DERMAX can be used in clinics, operating rooms, intensive care units, laboratories, dentistry etc. It is used for hands and skin.

ANTI-MICROBIAL CHARACTERISTICS

(Biocidal TP 1) For Hygienic hand antisepsis; 3-5 ml DERMAL solution is handled and applied by rubbing until the hands get dry for 60 seconds. For Surgical hand antisepsis; 5 ml of DERMAL hand antiseptic is handled and applied on wrist and elbows until it gets dry for 3 minutes.
