

DATASHEET DILUTION DEVICE

Optimize Your Concentrate Usage

PRODUCT SPECIFICATIONS

This device offers practical solutions in various areas of use with a dilution capacity of 0.08% to 25%. This allows users to achieve their desired concentration, providing flexible and customized use. Thanks to its compact design, it takes up minimal space in the area of use and can be easily transported.

AREAS OF USE

Can be used for any product to dilute the concentrated liquid in desired ratio.

USE

The product is mounted on the wall at a maximum height of 160 cm and a minimum height of 130 cm from the ground. According to the product to be diluted, the appropriate colour bead is attached to the device for the required concentration setting. It is connected to the city mains water inlet. Open the lid of the product to be diluted and immerse the dilution tip hose into the concentrated product. Mains water is supplied to the device. The dilution process is performed by pressing the dilution button on the front of the device.
