## DISINFECTION BASINS

Effortless Disinfection: Ensuring safety with every rinse

### PRODUCT SPECIFICATIONS

Our disinfection basins are designed for durability and long-lasting performance. They are made from high-quality materials and built to withstand exposure to chemicals without being damaged; they have a large volume that can be used in harmony with various disinfectants and cleaners.

### AREAS OF USE

Cleaning and disinfection of flexible and solid endoscopes and surgical instruments.

### DESIGN

There are slots on the main body for draining the inner chamber and promises a reliable use with its easily wipeable and smooth body. It is manufactured in a robust structure without compromising on material thickness and has maximum resistance to chemicals.
