

# DATASHEET

# DISTILLED WATER

Ultra-Pure Water for a Variety of Applications

## PRODUCT SPECIFICATIONS

It is used in hospitals, microbiology laboratories, machines operating with pure water in labs, the battery production industry, food manufacturing, pharmaceutical production processes, high-pressure steam boilers, industrial experiments, and as a substitute for water in production. It is also suitable for humidifying baby incubators, incubators, respirators, and nebulizer chambers.

## AREAS OF USE

Distilled water is suitable for use in dialysis units, sterilization units, laboratories, general cleaning purposes, and for ensuring the proper operation of various medical devices in healthcare settings.
