

# DATASHEET ENZYM PERFECT

Convenient Ready-to-Use Formula for  
Effective Cleaning of Medical  
Instruments

## CHEMICAL COMPOSITION

5-enzyme (amylase, lipase, prosthesis, cellulase, mannanase), nonionic surfactants, benzalkonium chloride, corrosion inhibitors and auxiliaries.

## PRODUCT SPECIFICATIONS

ENZYM PERFECT is an enzymatic spray cleaning and disinfecting solution designed for dirty instruments. It is ready to use in foam form. The spray gun is integrated in the packaging and delivers a solution in foam form without generating aerosol during use. Thanks to the dense foam, the solution covers the instruments equally.

## AREAS OF USE

It is suitable for moistening and disinfecting soiled medical and surgical instruments that cannot be transferred to the sterilization unit during removal and transfer. It also ensures disinfection by maintaining sufficient moisture levels to prevent dried blood and organic materials from drying out. Materials treated with Enzym Perfect can be safely kept in solution until they are transferred to the sterilization unit.

## ANTI-MICROBIAL CHARACTERISTICS

Bactericide, fungicide, virucide
