

DATASHEET

GDA 2%

Rapid and Effective Endoscope And
Medical Instrument Disinfection

CHEMICAL COMPOSITION

Glutaraldehyde 2%, Anticorrosive agents, auxiliary agents and deionised water

PRODUCT SPECIFICATIONS

Formulated with 2% GDA, this antimicrobial disinfectant and corrosion inhibitor is effective for up to 30 days. It is a ready-to-use, colorless, odorless, non-toxic solution designed for high-level sterilization of surgical and endoscopic equipment. It is free of phenol, chlorine, and formaldehyde.

AREAS OF USE

Ideal for sterilizing all types of surgical equipment, heat-sensitive anesthesia accessories (e.g. Ambu masks), all types of endoscopes (Karl Storz, Olympus, Pentax, Fujinon, flexible and rigid), as well as laparoscopic equipment. Does not damage endoscope covers, preventing rust, corrosion, softening or discoloration. GDA 2% is suitable for sterilizing medical equipment made of rubber, plastic, glass, PVC, acrylic, polymer, polycarbonate, polystyrene, porcelain and stainless steel.

ANTI-MICROBIAL CHARACTERISTICS

Bactericidal, Fungicidal, Sporocidal, Virucidal, Tuberculocidal, Micobactericidal
