

Powerful Disinfection for Healthcare

Environments with Organic Acid Hydrogen Peroxide

CHEMICAL COMPOSITION

14% Hydrogen Peroxide - 2.9%

PRODUCT SPECIFICATIONS

An organic hydrogen peroxide-based disinfectant designed for healthcare facilities, it ensures effective cleaning and disinfection in high-risk areas such as operating rooms, intensive care units and laboratories. Phenol and aldehyde-free, it provides rapid sterilization at low concentrations. Featuring excellent material compatibility, it is safe for surfaces such as polystyrene, stainless steel, PVC, polycarbonate, ceramic, ABS, silicone, HDPE, rubber and glass. This dual-purpose solution simplifies protocols by combining cleaning and disinfection in a single step.

AREAS OF USE

Tools, equipment, instruments, and floor and surface materials in healthcare settings, including operating rooms, intensive care units, and laboratories.

ANTI-MICROBIAL CHARACTERISTICS

This disinfectant demonstrates bactericidal, fungicidal, virucidal, tuberculocidal, and sporicidal activity.
