

# DATASHEET

# POVIDERM 10%

Effective skin disinfectant solution

## CHEMICAL COMPOSITION

7,5% Povidone Iodine Solution, Disodium Hydrogen Phosphate, Cocamide Diethanolamine and Water

## PRODUCT SPECIFICATIONS

Hand and skin antiseptic, with a Povidone-Iodine base, provides quick and effective microbial action against bacteria and other microorganisms. Dermatologically tested, it ensures rapid antiseptis for hands and skin in a short application time.

## AREAS OF USE

Poviderm is a versatile antiseptic for skin and mucosal disinfection. It's commonly used before surgeries, gynecological procedures, biopsies, and injections. Effective for wound care, burns, bacterial infections, and superinfected dermatoses, it also functions as a hygienic and surgical hand disinfectant. Suitable for first aid in both clinical and home settings, it's ideal for treating minor injuries.

## ANTI-MICROBIAL CHARACTERISTICS

Bactericide, Fungicide, Virucide, Antimycobacterial, Tuberculocide
