

DATASHEET

POVIDERM 10%

OINTMENT

Rapid Action Antiseptic Ointment for Effective Skin Antisepsis in Healthcare

CHEMICAL COMPOSITION

10% Povidone Iodine

PRODUCT SPECIFICATIONS

POVIDERM 10% Ointment is a povidone-iodine-based antiseptic ointment, formulated for effective skin antisepsis in healthcare settings. It acts quickly to eliminate bacteria and other microorganisms, making it ideal for infection control. Dermatologically tested, it is compatible with the skin and safe for regular use.

AREAS OF USE

Skin and mucosa antisepsis - Antiseptic treatment of wounds, burns, and microbial infections - Treatment of superinfected dermatosis - First aid for minor injuries in home and patient care

ANTI-MICROBIAL CHARACTERISTICS

Bactericidal (*S. aureus*, *P. aeruginosa*, *E. coli*, *E. hirae*) - Fungicidal (effective against *C. albicans*) - Virucidal (Adenovirus, Poliovirus, Norovirus MNV, Vaccinia virus MVA) - Mycobactericidal (effective against *M. avium*, *M. terrae*) - Tuberculocidal (effective against *M. terrae*) The product conforms to various EN standards for biocidal efficacy and offers reliable, broad-spectrum antimicrobial action in 30 seconds to 5 minutes, depending on the microorganism.
