

DATASHEET RELIABLE

Special for use in fertility centers and assisted reproduction

CHEMICAL COMPOSITION

Bis (3-aminopropyl) dodecylamine, Didecylmethylpoly (oxethyl) Ammonium Propionate, corrosion inhibitor and auxiliary agents

PRODUCT SPECIFICATIONS

Reliable is a ready-to-use, high-activity disinfectant for medical equipment, including flexible and rigid endoscopes. Colorless, odor-free, and non-toxic, it contains no phenol, chlorine, or formaldehyde and includes a corrosion inhibitor for safe use on metal surfaces. Effective within 5 minutes, it remains active for up to 14 days and can be easily monitored with test strips.

AREAS OF USE

Reliable is ideal for disinfecting various surgical tools, heat-sensitive anesthetic accessories (e.g., ambu masks), flexible and rigid endoscopes, and dental instruments. It is compatible with brands like Karl Storz, Olympus, Pentax, and Fujinon and is safe for materials including rubber, PVC, acrylic, stainless steel, and more. It prevents issues like rust, corrosion, and discoloration on endoscope surfaces.

ANTI-MICROBIAL CHARACTERISTICS

Bactericide, Fungicide, Virucide, Antimycobacterial, Tuberculocide
