

DATASHEET

SPRAY X

High-Level, Corrosion-Resistant Disinfectant for Medical Surfaces

CHEMICAL COMPOSITION

It is a hydrogen peroxide-based anticorrosive product used for high-level disinfection of surfaces and medical devices.

PRODUCT SPECIFICATIONS

It is a hydrogen bioxa-based, corrosion-resistant product used for high-level disinfection of medical surfaces and devices. Spray X is a ready-to-use, highly effective disinfectant for all medical surfaces and devices, free of aldehyde, alcohol and phosphate. It is corrosion-resistant and can be used in all environments and areas requiring rapid and thorough disinfection, including hospitals and medical device surfaces. By using a special vaporizer

AREAS OF USE

Used in combination with a Micro Nebulizer, Fogging, or Misting Device, this product is designed for the disinfection of all horizontal and vertical surfaces, including floors, walls, and various areas and environments. It is effective on materials such as PVC, glass, PP, HDPE, acrylic glass, plexiglass, epoxy floors, walls, doors, and patient beds.

ANTI-MICROBIAL CHARACTERISTICS

bactericidal, fungicidal, mycobactericidal, tuberculocidal, virucidal, sporicidal activity
