Job Title: Java Fullstack Developer

Experience: 3+ Years

Location: Hyderabad / Bengaluru / Chennai / Pune

Employment Type: Full-Time/Contract/Remote

Job Summary:

We are seeking a highly skilled and innovative **Senior Java Fullstack Developer** with 5+ years of experience to join our team. The ideal candidate will have extensive expertise in building scalable, secure, and high-performance web applications using **Java** and modern fullstack technologies. At Samvida Labs You will be responsible for developing end-to-end solutions, leveraging cutting-edge tools and frameworks, and ensuring robust data security practices. The candidate must be committed to delivering fast, high-quality solutions while staying ahead of industry trends.

Key Responsibilities:

1. Fullstack Development:

- Design, develop, and maintain scalable web applications using **Java** for backend and modern frontend frameworks (e.g., **React**, **Angular**, or **Vue.js**).
- Build RESTful APIs and microservices using **Spring Boot**, **Spring Cloud**, and other Java-based frameworks.
- Develop responsive and intuitive user interfaces using **HTML5**, **CSS3**, and **JavaScript/TypeScript**.

2. Cutting-Edge Technologies:

- Leverage **cloud platforms** (e.g., **AWS**, **Azure**, **Google Cloud**) for deploying and scaling applications.
- Utilize **containerization tools** like **Docker** and orchestration platforms like **Kubernetes** for efficient deployment.
- Implement **real-time features** using **WebSockets**, **Server-Sent Events (SSE)**, or **GraphQL subscriptions**.
- Integrate **AI/ML capabilities** using libraries like **TensorFlow**, **PyTorch**, or H2O.ai.

3. Data Security & Compliance:

- Ensure applications are built with robust data security measures, including **encryption**, **secure authentication**, and **compliance with GDPR** and other relevant regulations.
- Implement secure API integrations and data storage solutions (e.g., **JWT**, **OAuth2**, **SSL/TLS**).
- Conduct regular security audits and vulnerability assessments to maintain application integrity.

4. Performance Optimization:

humanresources@samvidalabs.com

- Optimize application performance using tools like **JMeter**, **Gatling**, or **New Relic**.
- Implement caching mechanisms using **Redis** or **Memcached** for improved response times.
- Monitor and improve application performance using **APM tools** like **Dynatrace** or **AppDynamics**.
- 5. **Collaboration & Agile Development:**
 - Work closely with cross-functional teams, including designers, product managers, and DevOps engineers, to deliver high-quality solutions.
 - Participate in **Agile/Scrum** processes, including sprint planning, stand-ups, and retrospectives.
 - Ensure timely delivery of features and bug fixes in fast-paced development cycles.
- 6. **Testing & Quality Assurance:**
 - Write unit and integration tests using tools like **JUnit**, **Mockito**, and **TestNG**.
 - Conduct thorough testing to ensure bug-free and seamless user experiences.
 - Implement **CI/CD pipelines** using tools like **Jenkins**, **GitLab CI/CD**, or **CircleCI**.

Qualifications:

- Bachelor's or Master's degree in **Computer Science**, **Software Engineering**, or a related field.
- 3 years of professional experience in **Java Fullstack Development**.
- Strong expertise in **Java**, **Spring Boot**, **Spring MVC**, and **Hibernate**.
- Proficiency in frontend technologies such as **React**, **Angular**, or **Vue.js**.
- Experience with **RESTful APIs**, **GraphQL**, and **microservices architecture**.
- Knowledge of **cloud platforms** (e.g., **AWS**, **Azure**, **Google Cloud**) and **serverless computing**.
- Familiarity with **data security best practices** and tools (e.g., **JWT**, **OAuth2**, **SSL/TLS**).
- Strong understanding of **database systems** (e.g., **MySQL**, **PostgreSQL**, **MongoDB**).
- Experience with **DevOps tools** like **Docker**, **Kubernetes**, and **Terraform**.

Preferred Skills:

- Experience with **AI/ML integration** using libraries like **TensorFlow** or **PyTorch**.
- Familiarity with **event-driven architecture** using **Kafka** or **RabbitMQ**.
- Knowledge of **blockchain technology** and its integration into web applications.
- Experience with **progressive web apps (PWAs)** and **offline-first development**.
- Understanding of **performance monitoring tools** like **Dynatrace** and **AppDynamics**.
- Familiarity with **low-code/no-code platforms** for rapid prototyping.
