About us:

**cold,  
smooth &  
optimized.**

*lchsan - est. 1997*

*Ordo Ingeniaría Optimizata*

**Founded in 1997, Ichsan began as a specialized service provider assisting steel builders in managing steel work erection, enabling them to focus on the core aspects of their projects. Over the years, we have evolved to meet the growing needs of the industry, expanding our expertise into high-rise and long span structural design, oil & gas downstream facility design, and comprehensive project management.**

**With decades of experience, our team now also offers engineering auditing, casualty claims adjusters, and expert witness (design advocate) services applying our extensive engineering insights to assess, review, manage claims, and defend in complex situations.**

**At Ichsan, with our new logo, we re-emphasize our commitments to providing reliable, efficient services that empowers our clients to focus on their main objectives with confidence.**

what we are known for:

**extensive  
experience in  
supporting clients  
through  
engineering  
optimization**

# Marine Casualty Solutions

**From 'Good Hands' to 'Boxing Gloves,' We Help  
You Win the Fight**

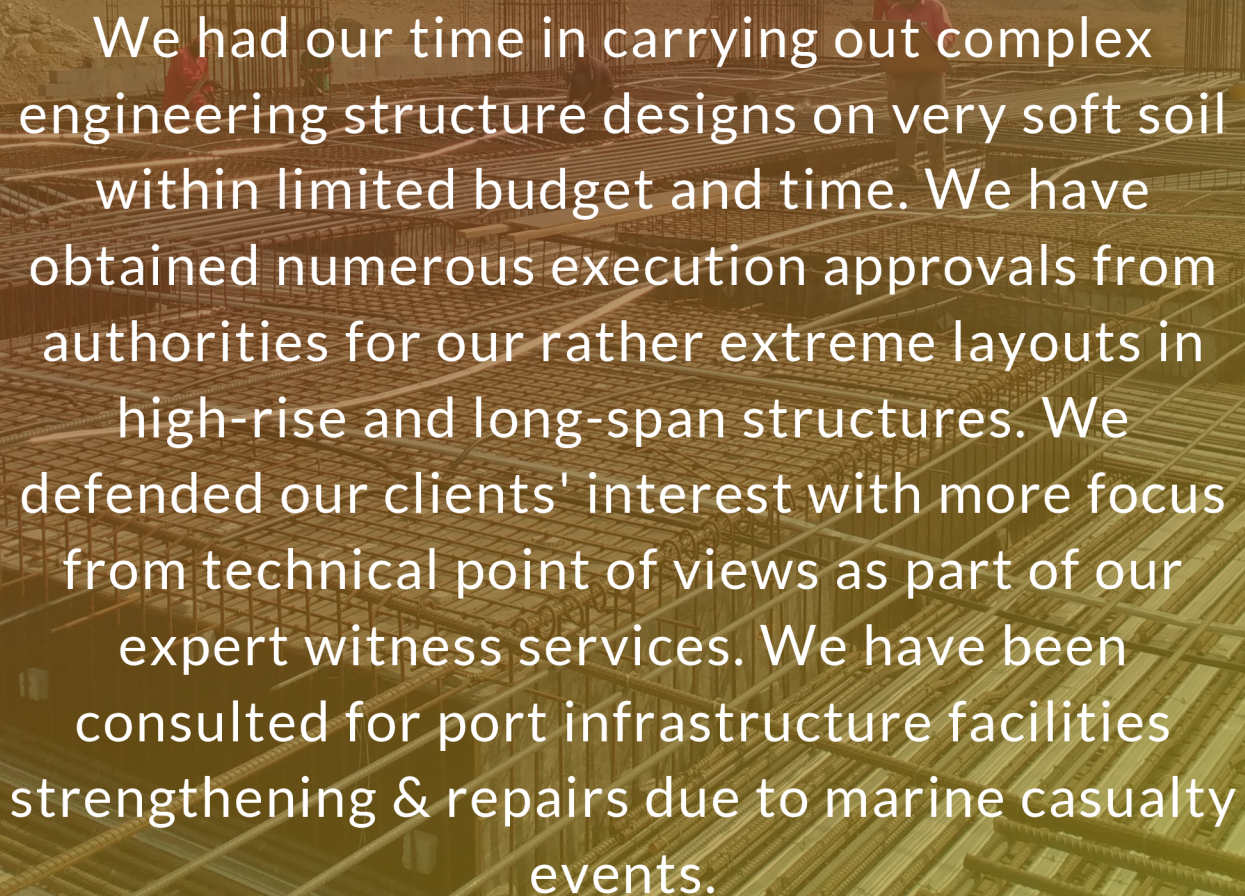

Turning the Tide in Your Favor: Our seasoned professionals offer expert consultation to navigate complex marine casualty challenges effectively.

We do it by thorough and accurate loss assessments, identifying and challenge misapplied exclusions, representing clients in settlements with insurers, and partnering with law firms or other professionals.

# Civil - Structure Engineering Specialist

In civil engineering, beside oil & gas facility engineering design, we have evolved to be a specialist in high-rise & long span structure projects.

We had our time in carrying out complex engineering structure designs on very soft soil within limited budget and time. We have obtained numerous execution approvals from authorities for our rather extreme layouts in high-rise and long-span structures. We defended our clients' interest with more focus from technical point of views as part of our expert witness services. We have been consulted for port infrastructure facilities strengthening & repairs due to marine casualty events.

At Ichsan, we pride ourselves on delivering tailored, client-focused solutions for a wide range of challenges in the marine and engineering sectors. Our expertise bridges technical precision with a deep understanding of regulatory and environmental considerations, enabling us to address issues with efficiency and innovation.

We provide a diverse range of services, with the following being some of the most commonly requested by our clients.

1. Site Assessment/Remediation
2. Remedial Investigation
3. Environmental Management
4. Brownfield Development
5. Litigation & Arbitration Support
6. Claim Review
