

Table Of Contents

Module 1: Introduction to Business Analytics and Optimization

- 1.1 Introduction to Business Analytics and Optimization
- 1.2 Data Analytics
- 1.3 Data Science
- 1.4 Challenges of Data Creation
- 1.5 Approaches to Help Maximize Profitability and Returns
- 1.6 What are Business Analytics?
- 1.7 Business Analytics Capabilities
- 1.8 Enterprise Analytics Capabilities
- 1.9 Business Analytics Technologies
- 1.10 Predictive Analytics
- 1.11 Prescriptive Analytics
- 1.12 A Fact-Based Decision-Making Culture
- 1.13 A Strong Data Infrastructure
- 1.14 The Right Analytical Tools
- 1.15 New Tools and Architectures May Be Needed
- 1.16 Analytics Workforce
- 1.17 Knowledge Requirements
- 1.18 Business Analyst
- 1.19 Data Scientist
- 1.20 Where to Place the Analytics Team
- 1.21 Optimization
- 1.22 Key BAO Concepts
- 1.23 The Need for BAO Now
- 1.24 Essential Capabilities in BAO
- 1.25 BAO Capabilities: Business Performance Management
- 1.26 BAO Capabilities: Predictive Analysis and Mining
- 1.27 Value of BAO to Business Organizations
- 1.28 Impact of BAO on Diverse Industries
- 1.29 Advantages to Implementing BAO Solutions
- 1.30 BAO Capabilities: Real-Time Analytics: Data in Motion
- 1.31 BAO Support for Decision-Making
- 1.32 High-Level Architecture of BAO
- 1.33 Importance of Reference Architecture
- 1.34 BAO Reference Architecture
- 1.35 BAO Reference Architecture to BAO Architects

Module 2: Data Warehouse

- 2.1 Decision Support
- 2.2 Three-Tier Decision Support Systems
- 2.3 Exploring and Analyzing Data
- 2.4 What is a Data Warehouse?
- 2.5 Data Warehouse Architecture Choices
- 2.6 Enterprise Data Warehouse
- 2.7 Independent Data Mart Architecture
- 2.8 Dependent Data Mart Architecture
- 2.9 Data Warehouse
- 2.10 Multidimensional Data
- 2.11 Conceptual Modeling of Data Warehouses
- 2.12 Data Warehouse Design Process
- 2.13 Single-Layer Architecture
- 2.14 Two-Layer Architecture
- 2.15 Three-Tier Data Warehouse Architecture
- 2.16 Data Warehouse Development
- 2.17 Multi-Tiered Architecture
- 2.18 Information Pyramid
- 2.19 BI Reporting Tool Architectures
- 2.20 Multidimensional Analysis Techniques
- 2.21 Data Analysis and OLAP
- 2.22 OLAP Server Architectures
- 2.23 Data Cube
- 2.24 OLTP vs. OLAP
- 2.25 Business Query
- 2.26 Dashboards and Scorecards Development
- 2.27 Metadata Model
- 2.28 Automated Tasks and Events
- 2.29 Mobile BI
- 2.30 Software Development Kit (SDK)
- 2.31 Setting Up Data for BI
- 2.32 Making BI Easy to Consume

Module 2: Data Warehouse

- 3.1 What is Business Intelligence?
- 3.2 Definitions of Business Intelligence
- 3.3 Sample BI Architecture
- 3.4 Things are Getting More Complex

- 3.5 BI Components and Architecture
- 3.6 Scope and Fit of BI Solutions within Existing Infrastructure
- 3.7 High-Level BI Process
- 3.8 A Single or a Few Applications
- 3.9 Benefits of BI
- 3.10 Maximize Value from BI Systems
- 3.11 Strategy and Business Intelligence
- 3.12 Business Transformation Projects
- 3.13 Business Role of BI (TWDI)
- 3.14 ASUG Business Intelligence Maturity Model
- 3.15 Why Act?
- 3.16 BI Effectiveness Scorecard
- 3.17 BI Value Scorecard
- 3.18 Five Key Areas of Strategy
- 3.19 Planning a BI Project
- 3.20 Pre-Engagement Activities

Module 4: Data Mining

- 4.1 Unit Objectives
- 4.2 What is Data Mining?
- 4.3 Evolution of Data Mining
- 4.4 Why Data Mining?
- 4.5 Knowledge-based System
- 4.6 Self Evaluation: Exercise 14
- 4.7 Data Mining Process
- 4.8 Phases of Data Mining Process
- 4.9 Self Evaluation: Exercise 15
- 4.10 Data Mining Process
- 4.11 KDD Process Model
- 4.12 CRISP-DM
- 4.13 Self Evaluation: Exercise 16
- 4.14 CRISP-DM
- 4.15 CRISP-DM Elaborate View
- 4.16 Data Mining on What Kinds of Data?
- 4.17 DM Tasks and Components of DM Methods
- 4.18 Data Mining Operations
- 4.19 Data Mining Techniques
- 4.20 Data Mining Techniques (Continued)
- 4.21 Industry Examples of Application of DM
- 4.22 Challenges of Data Mining

- 4.23 Why Machines Should “Learn”?
- 4.24 What is Machine Learning?
- 4.25 Growth of Machine Learning
- 4.26 Machine Learning Types
- 4.27 Unsupervised Learning
- 4.28 Reinforcement Learning

Module 5: Data Storytelling with Table

- 5.1 Unit Objectives
- 5.2 Definition of Dashboard
- 5.3 Dashboard Types
- 5.4 Layers of Information
- 5.5 Evolution of Dashboards
- 5.6 Dashboard Design
- 5.7 Dashboard Design Principles (1 of 2)
- 5.8 Dashboard Design Principles (2 of 2)
- 5.9 Chart Overview
- 5.10 Singular Components
- 5.11 Metrics
- 5.12 Kaplan-Norton Balanced Scorecard
- 5.13 The Rayport-Jaworski Performance Dashboard and Strategy Framework
- 5.14 Introducing the R-J Performance Dashboard
- 5.15 Blueprint to the R-J Performance Dashboard
- 5.16 Building Reports
- 5.17 List Report
- 5.18 Data Group, Sort, and Filters
- 5.19 Add Calculations to Report
- 5.20 Conditions and Aggregations in Report
- 5.21 Drilling in Report
- 5.22 Run Report: On-Demand or Scheduled
- 5.23 Charts
- 5.24 Chart Type: Bar Chart
- 5.25 What is Data Visualization?
- 5.26 Data Visualization Tools
- 5.27 What is Tableau?
- 5.28 Tableau Features
- 5.29 Tableau Products
- 5.30 Tableau Architecture
- 5.31 An Introduction to Tableau Workspace
- 5.32 Tableau Charts

- 5.33 How to Post Tableau Service Dashboards?
- 5.34 Tableau Computation
- 5.35 Basic Tableau Calculation Functions
- 5.36 Quick Filters

Module 6: Introduction to Big Data Analytics

- 6.1 Unit Objectives
- 6.2 What is Big Data?
- 6.3 Intrinsic Property of Data as it Grows
- 6.4 A Growing Interconnected and Instrumental World
- 6.5 Need for Big Data
- 6.6 Characteristics of Big Data
- 6.7 Self Evaluation: Exercise 20
- 6.8 Structure of Big Data and Need for Standards
- 6.9 Big Data Analytics Adoption
- 6.10 Benefits & Barriers of Big Data Analytics
- 6.11 Trends for Big Data Analytics
- 6.12 Commoditization of Hardware Enabling New Analytics
- 6.13 The 5 Key Big Data Use Cases
- 6.14 More Ways, Wide-Ranging Analytics and Techniques
- 6.15 Big Data Platform and Application Frameworks
- 6.16 A Big Data Platform Manifesto
- 6.17 Use Cases for a Big Data Platform

Module 7: Industry Use Cases for Business Analytics

- 7.1 Unit Objectives
- 7.2 Descriptive Statistics
- 7.3 Inferential Statistics
- 7.4 Univariate Analysis
- 7.5 Factor Analysis
- 7.6 Cluster Analysis
- 7.7 Density-based Clustering
- 7.8 Variance Analysis
- 7.9 Discriminatory Analysis
- 7.10 Multidimensional Scaling
- 7.11 Collaboration Methods
- 7.12 K-means Grouping
- 7.13 Redundancy Analysis
- 7.14 Market Basket Analysis
- 7.15 Introduction to RFM and Capstone Project
- 7.16 Recency, Frequency, and Monetary Analysis
