SUMMARY

I am a product-focused analyst and designer with a Master's in Interaction Design and a background in Computer Science. I specialize in bridging the gap between complex data and user-centered design. With professional experience in business analysis and a deep understanding of UX principles, I create solutions that are both functional and backed by data. I am comfortable working in remote, multicultural environments and communicating with international clients.

EXPERIENCE

UX Designer (Freelance & Academic Projects)

Self-Employed / Harbour.Space @ UTCC | 2024 – Present

- Designed user interfaces and prototypes for international clients and academic projects during my Master's degree.
- Conducted user research and testing to ensure designs met real user needs and business goals.
- Collaborated with remote teams in multicultural environments to deliver design solutions on time.
- Focused on creating clean and functional wireframes that simplify complex user journeys.

Senior Business Analyst

A Insurance Co.Ltd | 2022 – 2023

- Analyzed data from various departments to help management make better strategic decisions.
- Created data dashboards and reports using SQL and PowerBI to provide clear business insights.
- Acted as a bridge between business stakeholders and technical teams to clarify project requirements.
- Conducted market research and competitor analysis to identify areas for product improvement.

Product Designer (Visual & Branding)

Thunder Apparels | 2018 – 2022

- Developed visual brand identities including logos, packaging, and company profiles.
- Designed graphics for apparel and marketing materials that connected with the target audience.
- Ensured all design elements were consistent with the brand's voice and professional standards.

Operations & Management

Jivita Traditional Medicine Production (Private Enterprise) | 2014 – Present

- Managed business operations including stock handling, purchasing, and financial oversight.
- Used customer insights and business data to guide product lifecycle decisions.
- Ensured operational efficiency and consistent brand quality across production lines.
