March 2026 – Vol. 2 – Issue 2

Hello Members!

It's been a long, cold, windy, rainy, and snowy winter. I love living in a place that experiences all four seasons. There's something special about each one. But I have to admit, I'm ready for winter to be over. Bring on the warmth! I can't wait to smell spring in the air, the fresh grass, the busy pollinators, and yes... even the weeds.

There's something magical about this in-between moment when the world starts to wake up. The days grow a little longer, the light feels softer, and you can sense the earth stretching after its long rest. Soon, we'll be out in our gardens again, planning, planting and watching life return in all its color and energy. Spring reminds us that no matter how long the winter, renewal always comes, and that's something truly worth celebrating.

I look forward to seeing all the amazing work beautifying our region from all of our talented and devoted garden club members.

District Director,

Betty
