Announcement of Rates of Return on Investments during CY-2026

November 03, 2025

KENFI-Powered Mudharba Portfolio Management Services **Smart Advisory | Confident Trades | Massive Returns**

At Kohenoor Technologies, the KENFI-Powered Mudharba fuses faith-based ethical investing with AI-driven financial intelligence. Built upon the Unrestricted Mudharba model, it grants our fund managers full discretion to pursue the most promising opportunities across global markets; ensuring optimal capital efficiency, disciplined risk management, and consistent performance.

Overview

The KENFI Mudharba portfolio management framework utilizes multi-asset diversification across cryptocurrencies, commodities, equities, forex, and digital instruments. Every portfolio is powered by KENFI's proprietary AI engine, integrating technical indicators (EMA, RSI, PPO, MACD), market sentiment analytics, and 11 secret intelligence keys to deliver high-precision advisory and execution.

All KENFI advisories are validated by human veterans with over 25 years of professional investment and trading experience, ensuring every recommendation combines algorithmic accuracy with human market wisdom.

A 1.5% upfront commission applies as a service fee for onboarding and fund management. Both fiat and crypto investments are accepted, empowering investors locally and globally.

Mode: Unrestricted Mudharba

All ROR figures below are expressed in Net Annual Terms:
