

White Paper: Kohenoor KEN (Corporate) Supplementary (V.1)

1. Abstract

Kohenoor KEN (Corporate) is a token on Binance Smart Chain representing tokenized shares and dividend rights of Kohenoor Technologies and umbrella projects of Knowledge Gateway. It enables staking, revenue sharing, and fractional ownership under a hybrid finance (HyFi) model.

2. Strategic Purpose

- Tokenizes revenue streams from Kohenoor Tech's products: KENFI, KENABI, KENCOM, KGS & ProEdge
- Establishes investor confidence with regulated mechanisms like whitelist / blacklist, pausable functions
- Funds global expansion and innovation via token-based crowdfunding

3. Tokenomics

- Maximum Supply: 100,000 KEN
- 30% held by core developers and investors
- 50,000 KEN reserved for strategic partnerships
- Release: 10% quarterly
- Fully Diluted Valuation tied to corporate earnings
- Rewards: Staking, dividend distribution, loyalty airdrops

4. Use Cases

- Asset tokenization of real revenue projects
- Staking and profit sharing
- Exclusive access to premium corporate services
- DAO-based governance for large holders

5. Roadmap

- Q4 2023: Launch on Binance Smart Chain
- 2025-2026: Strategic investor on boarding
- 2026–2027: Global fund offices in Riyadh, Lahore, New York
- 2026 onwards: Tier-1 exchange listings, legal token equity models in selected countries
