

Kohenoor KEN – Official Whitepaper

(Brief Unified Genesis Edition)

Executive Summary

Kohenoor KEN represents the unified evolution of Kohenoor KEN (Payments) and Kohenoor KEN (Corporate); a premium ERC-20 asset on the Ethereum network with bridging planned for Binance Smart Chain. With a total supply of only 101,966 tokens; KEN establishes itself as a symbol of exclusivity and technological excellence. It acts as the single transactional spine of the Kohenoor ecosystem; integrating AI; blockchain; and decentralized finance to deliver human-centric financial empowerment.

Vision & Philosophy

Kohenoor KEN is more than a token; it is a vision of decentralized intelligence. As the premium asset token of the Kohenoor ecosystem; KEN fuels an AI-driven financial infrastructure bridging finance; education; and innovation. Its role as the single transactional spine enables frictionless interaction between Kohenoor Technologies; KENFI; KENEX; KENCOM; ProEdge; and Knowledge Gateway Schools.

Core Utilities

- Fee settlement within all Kohenoor ecosystem platforms;
- Staking and participation in KENFI-powered Mudharba Portfolio Management Services;
- Access to AI-driven trading advisories and dashboards;
- Exclusive rights within KENEX and KENCOM ecosystems;
- Payment gateway for ProEdge and Knowledge Gateway educational services;
- Cross-chain liquidity and ecosystem participation.

Tokenomics

Total Supply: 101,966 KEN; Fixed Supply; No minting; No burning beyond the initial merge process.

Allocation	%age	Vesting / Notes
Founders & Core Team	25%	36-month vesting
Institutional & Private Investors	15%	Strategic rounds
Treasury & Reserves	20%	Long-term sustainability

Staking & Rewards	10%	KENFI-linked returns
Ecosystem Development Fund	10%	R&D and ecosystem grants
Public Offering	20%	Initial public availability

Roadmap

1. Q4 2025: DEX listing on Ethereum;
2. Q1 2026: Mudharba Fund Launch and DeFi dashboard integration;
3. Q2 2026: Bridge deployment to Binance Smart Chain;
4. Q3 2026: AI-driven financial intelligence integration (KENFI 2.0);
5. 2027 onward: Institutional partnerships; DeFi governance and yield expansion.

Security & Technology

Kohenoor KEN incorporates advanced safety and reliability protocols; including two-step ownership transfer; disabled renounce function to prevent accidental ownership loss; safe wallet rescue functionality; and CCIP-ready interoperability for future bridging. KEN maintains a fixed-supply model ensuring exclusivity; scarcity; and long-term investor confidence.

Ecosystem Integration

KEN powers and connects the Kohenoor suite of platforms; functioning as the central financial and transactional layer across:

- KENFI – AI-powered investment intelligence;
- KENEX – Global asset tokenization;
- KENCOM – Decentralized communication and payments;
- ProEdge – AI and BI professional training;
- Knowledge Gateway – Foundational education in DeFi and technology.

Legal & Compliance

Kohenoor KEN is classified as a non-security utility token; designed for functional use within the Kohenoor ecosystem. It complies with applicable DeFi and fintech frameworks and excludes availability in restricted jurisdictions. The token operates transparently under Ethereum standards and adheres to core ethical principles of Islamic Shariah
