**SUMMARY**

inContour Landscape Architecture specializes in innovative, sustainable landscape solutions. Our team is committed to creating landscapes that balance aesthetic beauty, ecological sensitivity, and practical functionality. We provide full-service landscape architecture designs for federal, state, and municipal projects. Services include landscape design, hardscape design, lighting design, irrigation design, master planning, public workshops and outreach, project management, construction administration, graphic design, visual simulations, and illustrations. Competency in planning and design of campuses, patios, plazas, trails, rooftops, streetscape and roadside design, stream and wetland restoration, habitat restoration, parks, playgrounds, campgrounds, and rest areas.

**EXPERIENCE**

inContour has successfully delivered projects across Montana and Utah and is equipped to provide services nationwide. Our portfolio includes diverse private sector projects such as commercial developments, multi-family housing, mobile home communities, parks, playgrounds, and private residential landscapes. While our experience has focused on these sectors, our expertise in landscape architecture, planning, and project management aligns seamlessly with the needs of federal, state, and local government contracts, enabling us to deliver high-quality, sustainable, and functional designs on a national scale.
