

Message from the Chairman

I would like to take this opportunity to thank you for entrusting your most precious profession with us .

Our mission is to offer quality education which aims at realizing the full potential physical emotional intellectual and spiritual of each child and to instill in him/her the value and attitudes for success in life as well as to become an out honest human being.

In the Montessori Wing our child oriented education AIDS in developing inner discipline, creativity and positive self image as he /she is respected as a total unique person and allowed to work at his her own pace and level of readiness.

In the Senior wing , highly competent , trained adults formally educated in the philosophy and methodology , appropriate to the child's age level will communicate the love of learning which is the source of true education.

Gurgaon World School will imbibe the best of the East and the west and encourage children to look to India's heritage- its past and present and prepare them for the future . The future of India, I believe , will be brighter if we take pains to understand the real worth of our culture values and spiritual basis for universal understanding.

We hope to present the world to our children , so in turn , they can present themselves to the world .

We are as eager as you are for your children to find satisfaction in school and with your support and cooperation success is guaranteed.

Thank you once again.
