NAME OF EVENT

International Conference in Economics,
Business, Humaniora and Applied Science
(ICEBHAS – 2024)

THEME

COMPLEXITY OF SUSTAINABLE DEVELOPMENT:
Foresight within Interdisciplinary Studies and its
Extension

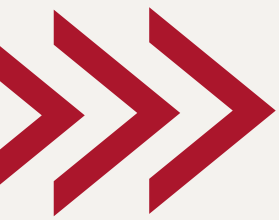

BACKGROUND

Has gained prominence from the late 20th century onwards. This period witnessed an increasing recognition that traditional, siloed approaches to social and economic issues were inadequate for addressing the multifaceted challenges of globalised and interconnected societies. Would be an advanced research and educational institute dedicated to exploring, understanding, and innovating in the field of complex systems, drawing on multiple disciplines.

focusing on a complex systems approach across such diverse areas, bridges disparate fields of study, offering novel insights & solutions to contemporary challenges. Integrating methodologies & perspectives from economics, business, social sciences, humanities & religion contributes to a deeper understanding of the dynamics, interdependencies & emergent properties of complex systems in human society.

BACKGROUND

The "International Conference in Economics, Business, Humaniora and Applied Science" Series of International Conferences [ICEBHAS -2024] WITH THE THEME: COMPLEXITY OF SUSTAINABLE DEVELOPMENT:Foresight within Interdisciplinary Studies and its extension, was organized to accomodate The interaction between economics, business, social science, education, and foresight within interdisciplinary studies offers a rich needlepoint for exploring and enhancing sustainable development.

At its core, this integration seeks to leverage insights from multiple disciplines to understand better and predict future trends, thereby enabling more informed decision-making today. This approach is particularly relevant in sustainable development, where the need to balance economic growth with environmental preservation and social equity is dominant.

VISSION

To be a leading global center for complex systems studies, contributing significantly to solving real-world challenges through interdisciplinary approaches.

MISSION

- 1.To advance understanding of complex systems through interdisciplinary research and education.
 - 2.Applies network theory to understand the complex web of social relationships & their impact on societal trends, political movements & cultural shifts.
 - 3.Focuses on how economic phenomena emerge from the interactions of diverse agents, leading to patterns, structures & behaviours.
 - 4.Examines businesses as complex adaptive systems with external economic conditions to influence outcomes.
 - 5.Facilitating cross-disciplinary and cross-cultural dialogues to foster mutual understanding and collaborative problem-solving.
-
