As you all know I have a chronic progressive medical condition that requires very expensive medication and medical procedures like MRIs

For some reason Sean took it upon himself to remove me from my the health insurance despite that it is a blatant and direct violation of our divorce decree.

I'm disgusted and you all should be too. This endangers not only me but the children having a healthy mother.

Sean has no attorney to answer too and is repeatedly violating the divorce decree. He is putting my health at risk which directly impacts the children.

I know no one want to get involved but I am repeatedly being backed into a corner by Sean. This should not of happened

I'm horrified he would do this esp with no notice what so ever. I work too on call jobs with no benefits.

If there is any common decency left in any of you I hope you speak up.

This too far.
